THE FUND

The Altegris Crabel Multi- Strategy Fund, (the "Fund") is a series of Northern Lights Fund Trust, a Delaware statutory trust organized on January 19, 2005 (the "Trust"). The Trust is registered as an open-end management investment company. The Trust is governed by its Board of Trustees (the "Board" or "Trustees" or "Board of Trustees").

The Fund may issue an unlimited number of shares of beneficial interest. All shares of the Fund have equal rights and privileges. Each share of the Fund is entitled to one vote on all matters as to which shares are entitled to vote. In addition, each share of the Fund is entitled to participate equally, on a class-specific basis, with other shares (i) in dividends and distributions declared by the Fund and (ii) on liquidation to its proportionate share of the assets remaining after satisfaction of outstanding liabilities. Shares of the Fund are fully paid, non-assessable and fully transferable when issued and have no pre-emptive, conversion or exchange rights. Fractional shares have proportionately the same rights, including voting rights, as are provided for a full share.

The Fund's investment objective, restrictions and policies are more fully described here and in the Prospectus. The Board may add classes to the Fund, start other series and offer shares of a new fund under the Trust at any time.

This SAI describes the classes of shares offered by the Fund: Class A shares and Class I shares. Each share class represents an interest in the same assets of the Fund, has the same rights and is identical in all material respects except that (i) each class of shares may be subject to different (or no) sales loads, (ii) each class of shares may bear different (or no) distribution fees; (iii) each class of shares may have different shareholder features, such as minimum investment amounts; (iv) certain other class-specific expenses will be borne solely by the class to which such expenses are attributable, including transfer agent fees attributable to a specific class of shares, printing and postage expenses related to preparing and distributing materials to current shareholders of a specific class, registration fees paid by a specific class of shares, the expenses of administrative personnel and services required to support the shareholders of a specific class, litigation or other legal expenses relating to a class of shares, Trustees' fees or expenses paid as a result of issues relating to a specific class of shares and accounting fees and expenses relating to a specific class of shares and (v) each class has exclusive voting rights with respect to matters relating to its own distribution arrangements. The Board of Trustees may classify and reclassify the shares of the Fund into additional classes of shares at a future date.

Under the Trust's Agreement and Declaration of Trust, each Trustee will continue in office until the termination of the Trust or his/her earlier death, incapacity, resignation or removal. Shareholders can remove a Trustee to the extent provided by the Investment Company Act of 1940, as amended (the "1940 Act") and the rules and regulations promulgated thereunder. Vacancies may be filled by a majority of the remaining Trustees, except insofar as the 1940 Act may require the election by shareholders. As a result, normally no annual or regular meetings of shareholders will be held unless matters arise requiring a vote of shareholders under the Agreement and Declaration of Trust or the 1940 Act.

The use of financial instruments is subject to applicable regulations of the SEC, the several exchanges upon which they are traded and the Commodity Futures Trading Commission (the "CFTC"). In addition, the Fund's ability to use financial instruments will be limited by tax considerations. The Fund is a commodity pool subject to regulation under the Commodity Exchange Act. In addition to the instruments, strategies and risks described below and, in the Prospectus, the Adviser may discover additional opportunities in connection with financial instruments and other similar or related techniques. These new opportunities may become available as the Adviser develops new techniques, as regulatory authorities broaden the range of permitted transactions and as new financial instruments or other techniques are developed. The Adviser may utilize these opportunities to the extent that they are consistent with the Fund's investment objective and permitted by the Fund's investment limitations and applicable regulatory authorities. The Prospectus or this SAI will be supplemented to the extent that new products or techniques involve materially different risks than those described below or in the Prospectus.

The Fund and its Subsidiary (as defined below under “Wholly-Owned Subsidiary”) are “commodity pools” under the U.S. Commodity Exchange Act (“CEA”), and the adviser is registered as a “commodity pool” operator with the CFTC and is a member of the National Futures Association (“NFA”). As a registered commodity pool operator with respect to the Fund and each Subsidiary, the adviser must comply with various regulatory requirements under the CEA, and the rules and regulations of the CFTC and the NFA, including investor protection requirements, antifraud prohibitions, disclosure requirements, and reporting and recordkeeping requirements. The adviser is also subject to periodic inspections and audits by the CFTC and NFA.

TYPES OF INVESTMENTS

The investment objective of the Fund and the descriptions of the Fund's principal investment strategies are set forth under the Fund's “Fund Summary”, “Investment Objectives” and “Principal Investment Strategies” in the Prospectus. The Fund's investment objective is not fundamental and may be changed without the approval of a majority of the outstanding voting securities of the Trust. To the extent an investment strategy or risk is not disclosed in the Fund's prospectus, such strategy or risk is a non-principal strategy or risk of the Fund.

The following pages contain more detailed information about the types of instruments in which the Fund may invest, directly or indirectly, and investment strategies that Altegris Advisors, L.L.C. (the “Adviser” or “Altegris”) and Crabel Capital Management, LLC (the “Sub-Adviser” or “Crabel”), may employ in pursuit of the Fund's investment objective(s), and a summary of related risks.

Debt Securities

United States Government Obligations

These consist of various types of marketable securities issued by the United States Treasury, i.e., bills, notes and bonds. Such securities are direct obligations of the United States government and differ mainly in the length of their maturity. Treasury bills, the most frequently issued marketable government security, have a maturity of up to one year and are issued on a discount basis. The Fund may also invest in Treasury Inflation-Protected Securities (“TIPS”). TIPS are special types of treasury bonds that were created in order to offer bond investors protection from inflation. The values of the TIPS are automatically adjusted to the inflation rate as measured by the Consumer Price Index (“CPI”). If the CPI goes up by half a percent, the value of the bond (the TIPS) would also go up by half a percent. If the CPI falls, the value of the bond does not fall because the government guarantees that the original investment will stay the same. TIPS decline in value when real interest rates rise. However, in certain interest rate environments, such as when real interest rates are rising faster than nominal interest rates, TIPS may experience greater losses than other fixed income securities with similar duration.

United States Government Agencies’ Obligations

These consist of debt securities issued by agencies and instrumentalities of the United States government, including the various types of instruments currently outstanding or which may be offered in the future. Agencies include, among others, the Federal Housing Administration, Government National Mortgage Association (“Ginnie Mae”), Farmer's Home Administration, Export-Import Bank of the United States, Maritime Administration, and General Services Administration. Instrumentalities include, for example, each of the Federal Home Loan Banks, the National Bank for Cooperatives, the Federal Home Loan Mortgage Corporation (“Freddie Mac”), the Farm Credit Banks, the Federal National Mortgage Association (“Fannie Mae”), and the United States Postal Service. These securities are either: (i) backed by the full faith and credit of the United States government (e.g., United States Treasury Bills); (ii) guaranteed by the United States Treasury (e.g., Ginnie Mae mortgage-backed securities); (iii) supported by the issuing

agency's or instrumentality's right to borrow from the United States Treasury (e.g., Fannie Mae Discount Notes); or (iv) supported only by the issuing agency's or instrumentality's own credit (e.g., Tennessee Valley Association).

Government-related guarantors (i.e. not backed by the full faith and credit of the United States Government) include Fannie Mae and Freddie Mac. Fannie Mae is a government-sponsored corporation owned entirely by private stockholders. It is subject to general regulation by the Secretary of Housing and Urban Development. Fannie Mae purchases conventional (i.e., not insured or guaranteed by any government agency) residential mortgages from a list of approved seller/servicers which include state and federally chartered savings and loan associations, mutual savings banks, commercial banks and credit unions and mortgage bankers. Pass-through securities issued by Fannie Mae are guaranteed as to timely payment of principal and interest by Fannie Mae but are not backed by the full faith and credit of the United States Government.

Freddie Mac was created by Congress in 1970 for the purpose of increasing the availability of mortgage credit for residential housing. It is a government-sponsored corporation formerly owned by the twelve Federal Home Loan Banks and now owned entirely by private stockholders. Freddie Mac issues PCs, which represent interests in conventional mortgages from Freddie Mac's national portfolio. Freddie Mac guarantees the timely payment of interest and ultimate collection of principal, but PCs are not backed by the full faith and credit of the United States Government. Commercial banks, savings and loan institutions, private mortgage insurance companies, mortgage bankers and other secondary market issuers also create pass-through pools of conventional residential mortgage loans. Such issuers may, in addition, be the originators and/or servicers of the underlying mortgage loans as well as the guarantors of the mortgage-related securities. Pools created by such nongovernmental issuers generally offer a higher rate of interest than government and government-related pools because there are no direct or indirect government or agency guarantees of payments in the former pools. However, timely payment of interest and principal of these pools may be supported by various forms of insurance or guarantees, including individual loan, title, pool and hazard insurance and letters of credit. The insurance and guarantees are issued by governmental entities, private insurers and the mortgage poolers.

Interests in pools of mortgage pass-through securities differ from other forms of debt securities (which normally provide periodic payments of interest in fixed amounts and the payment of principal in a lump sum at maturity or on specified call dates). Instead, mortgage pass-through securities provide monthly payments consisting of both interest and principal payments. In effect, these payments are a "pass-through" of the monthly payments made by the individual borrowers on the underlying residential mortgage loans, net of any fees paid to the issuer or guarantor of such securities. Unscheduled payments of principal may be made if the underlying mortgage loans are repaid or refinanced or the underlying properties are foreclosed, thereby shortening the securities' weighted average life. Some mortgage pass-through securities (such as securities guaranteed by Ginnie Mae) are described as "modified pass-through securities". These securities entitle the holder to receive all interest and principal payments owed on the mortgage pool, net of certain fees, on the scheduled payment dates regardless of whether the mortgagor actually makes the payment.

The principal governmental guarantor of mortgage pass-through securities is Ginnie Mae. Ginnie Mae is authorized to guarantee, with the full faith and credit of the U.S. Treasury, the timely payment of principal and interest on securities issued by lending institutions approved by Ginnie Mae (such as savings and loan institutions, commercial banks and mortgage bankers) and backed by pools of mortgage loans. These mortgage loans are either insured by the Federal Housing Administration or guaranteed by the Veterans Administration. A "pool" or group of such mortgage loans is assembled and after being approved by Ginnie Mae, is offered to investors through securities dealers.

Resets. The interest rates paid on the Adjustable Rate Mortgage Securities ("ARMs") in which the Fund may invest generally are readjusted or reset at intervals of one year or less to an increment over some predetermined interest rate index. There are two main categories of indices: those based on U.S. Treasury securities and those derived from a calculated measure, such as a cost of funds index or a moving average of mortgage rates. Commonly utilized

indices include the one-year and five-year constant maturity Treasury Note rates, the three-month Treasury Bill rate, the 180-day Treasury Bill rate, rates on longer-term Treasury securities, the National Median Cost of Funds, the one-month or three-month London Interbank Offered Rate (LIBOR), the prime rate of a specific bank, or commercial paper rates. Some indices, such as the one-year constant maturity Treasury Note rate, closely mirror changes in market interest rate levels. Others tend to lag changes in market rate levels and tend to be somewhat less volatile.

Caps and Floors. The underlying mortgages which collateralize the ARMs in which the Future Evolution Fund may invest will frequently have caps and floors which limit the maximum amount by which the loan rate to the residential borrower may change up or down: (1) per reset or adjustment interval, and (2) over the life of the loan. Some residential mortgage loans restrict periodic adjustments by limiting changes in the borrower's monthly principal and interest payments rather than limiting interest rate changes. These payment caps may result in negative amortization. The value of mortgage securities in which the Fund invests may be affected if market interest rates rise or fall faster and farther than the allowable caps or floors on the underlying residential mortgage loans. Additionally, even though the interest rates on the underlying residential mortgages are adjustable, amortization and prepayments may occur, thereby causing the effective maturities of the mortgage securities in which the Fund invests to be shorter than the maturities stated in the underlying mortgages.

Private Mortgage Pass-Through Securities. Private mortgage pass-through securities are structured similarly to the Ginnie Mae, Fannie Mae and Freddie Mac mortgage pass-through securities and are issued by United States and foreign private issuers such as originators of and investors in mortgage loans, including savings and loan associations, mortgage banks, commercial banks, investment banks and special purpose subsidiaries of the foregoing. These securities usually are backed by a pool of conventional fixed rate or adjustable rate mortgage loans. Since private mortgage pass-through securities typically are not guaranteed by an entity having the credit status of Ginnie Mae, Fannie Mae and Freddie Mac, such securities generally are structured with one or more types of credit enhancement.

Mortgage assets often consist of a pool of assets representing the obligations of a number of different parties. There are usually fewer properties in a pool of assets backing commercial mortgage-backed securities than in a pool of assets backing residential mortgage-backed securities hence they may be more sensitive to the performance of fewer mortgage assets. To lessen the effect of failures by obligors on underlying assets to make payments, those securities may contain elements of credit support, which fall into two categories: (1) liquidity protection and (2) protection against losses resulting from ultimate default by an obligor on the underlying assets. Liquidity protection refers to the provision of advances, generally by the entity administering the pool of assets, to ensure that the receipt of payments on the underlying pool occurs in a timely fashion. Protection against losses resulting from default ensures ultimate payment of the obligations on at least a portion of the assets in the pool. This protection may be provided through guarantees, insurance policies or letters of credit obtained by the issuer or sponsor from third parties, through various means of structuring the transaction or through a combination of such approaches. The degree of credit support provided for each issue is generally based on historical information respecting the level of credit risk associated with the underlying assets. Delinquencies or losses in excess of those anticipated could adversely affect the return on an investment in a security. The Fund will not pay any fees for credit support, although the existence of credit support may increase the price of a security.

Stripped Mortgage Securities. Stripped mortgage securities in which the Fund may invest may be issued by Federal Agencies, or by private originators of, or investors in, mortgage loans, including savings and loan associations, mortgage banks, commercial banks, investment banks and special purpose subsidiaries of the foregoing.

Stripped mortgage securities usually are structured with two classes that receive different proportions of the interest and principal distribution of a pool of mortgage assets. A common type of stripped mortgage security will have one class receiving some of the interest and most of the principal from the mortgage assets, while the other class will receive most of the interest and the remainder of the principal. In the most extreme case, one class will receive all of the interest (the interest-only or "IO" class), while the other class will receive all of the principal (the principal-only or

“PO” class). PO classes generate income through the accretion of the deep discount at which such securities are purchased, and, while PO classes do not receive periodic payments of interest, they receive monthly payments associated with scheduled amortization and principal prepayment from the mortgage assets underlying the PO class. The yield to maturity on a PO or an IO class security is extremely sensitive to the rate of principal payments (including prepayments) on the related underlying mortgage assets. A slower than expected rate of principal payments may have an adverse effect on a PO class security's yield to maturity. If the underlying mortgage assets experience slower than anticipated principal repayment, the Fund may fail to fully recoup its initial investment in these securities. Conversely, a rapid rate of principal payments may have a material adverse effect on an IO class security's yield to maturity. If the underlying mortgage assets experience greater than anticipated prepayments or principal, the Fund may fail to fully recoup its initial investment in these securities.

The Fund may purchase stripped mortgage securities for income, or for hedging purposes to protect the Fund's portfolio against interest rate fluctuations. For example, since an IO class will tend to increase in value as interest rates rise, it may be utilized to hedge against a decrease in value of other fixed-income securities in a rising interest rate environment.

Inverse Floaters. The Fund may invest in inverse floaters. Inverse floaters constitute a class of MBS with a coupon rate that moves inversely to a designated index, such as LIBOR (London Interbank Offered Rate) or 11th District Cost of Funds Index (“COFI”). Inverse floaters have coupon rates that typically change at a multiple of the changes of the relevant index rate. Any rise in the index rate (as a consequence of an increase in interest rates) causes a drop in the coupon rate on an inverse floater while any drop in the index rate causes an increase in the coupon rate of an inverse floater. In some circumstances, the coupon on an inverse floater could decrease to zero. In addition, like most other fixed-income securities, the value of inverse floaters will decrease as interest rates increase and their average lives will extend. Inverse floaters exhibit greater price volatility than the majority of mortgage-backed securities. In addition, some inverse floaters display extreme sensitivity to changes in prepayments. As a result, the yield to maturity of an inverse floater is sensitive not only to changes in interest rates but also to changes in prepayment rates on the related underlying mortgage assets. As described above, inverse floaters may be used alone or in tandem with interest-only stripped mortgage instruments.

Mortgage Dollar Rolls. The Fund may enter into mortgage dollar rolls with a bank or a broker-dealer. A mortgage dollar roll is a transaction in which a fund sells mortgage-related securities for immediate settlement and simultaneously purchases the same type of securities for forward settlement at a discount. While the Fund begins accruing interest on the newly purchased securities from the purchase or trade date, it is able to invest the proceeds from the sale of its previously owned securities, which will be used to pay for the new securities, in money market investments until future settlement date. The use of mortgage dollar rolls is a speculative technique involving leverage and is considered to be a form of borrowing by the Fund.

Collateralized Mortgage Obligations. There are certain risks associated specifically with collateralized mortgage obligations (“CMOs”). The Fund may invest in such CMOs. CMOs are debt obligations collateralized by mortgage loans or mortgage pass-through securities. The average life of CMOs is determined using mathematical models that incorporate prepayment assumptions and other factors that involve estimates of future economic and market conditions. These estimates may vary from actual future results, particularly during periods of extreme market volatility. Further, under certain market conditions, such as those that occurred in 1994, 2007, 2008 and 2009, the average weighted life of certain CMOs may not accurately reflect the price volatility of such securities. For example, in periods of supply and demand imbalances in the market for such securities and/or in periods of sharp interest rate movements, the prices of CMOs may fluctuate to a greater extent than would be expected from interest rate movements alone. CMOs issued by private entities are not obligations issued or guaranteed by the United States Government, its agencies or instrumentalities and are not guaranteed by any government agency, although the securities underlying a CMO may be subject to a guarantee. Therefore, if the collateral securing the CMO, as well as any third party credit support or guarantees, is insufficient to make payment, the holder could sustain a loss.

Collateralized Debt Obligations. Collateralized Debt Obligations ("CDOs") in which the Fund may invest include collateralized bond obligations ("CBOs"), collateralized loan obligations ("CLOs") and other similarly structured securities. CBOs and CLOs are types of asset-backed securities. A CBO is a trust which is backed by a diversified pool of high risk, below investment grade fixed income securities. A CLO is a trust typically collateralized by a pool of loans, which may include, among others, domestic and foreign senior secured loans, senior unsecured loans and subordinate corporate loans, including loans that may be rated below investment grade or equivalent unrated loans. CDOs may charge management fees and administrative expenses. For both CBOs and CLOs, the cash flows from the trust are split into two or more portions, called tranches, varying in risk and yield. The riskiest portion is the equity tranche which generally bears losses in connection with the first defaults, if any, on the bonds or loans in the trust and serves to provide some measure of protection to the other, more senior tranches from defaults. A senior tranche from a CBO trust or CLO trust typically has higher ratings and lower yields than the underlying securities and can be rated investment grade. Despite the protection from the equity tranche, CBO or CLO tranches can experience substantial losses due to actual defaults, increased sensitivity to defaults due to collateral default and disappearance of protecting tranches, market anticipation of defaults and aversion to CBO or CLO securities as a class. The risks of an investment in a CDO depend largely on the type of the collateral securities and the class of the CDO in which the Fund invests. Normally, CBOs, CLOs and other CDOs are privately offered and sold, and thus are not registered under the securities laws. As a result, investments in CDOs may be characterized by the Fund as illiquid securities; however, an active dealer market may exist for CDOs allowing a CDO to qualify under Rule 144A under the Securities Act. In addition to the normal risks associated with debt instruments (e.g., interest rate risk and credit risk), CDOs carry additional risks including, but not limited to: (1) the possibility that distributions from the collateral will not be adequate to make interest or other payments; (2) the quality of the collateral may decline in value or default; (3) that they may be subordinate to other classes; and (4) the complex structure of the security may not be fully understood at the time of investment and may produce disputes with the issuer or unexpected investment results.

Certificates of Deposit and Bankers' Acceptances

The Fund may invest in certificates of deposit and bankers' acceptances, which are considered to be short-term money market instruments.

Certificates of deposit are receipts issued by a depository institution in exchange for the deposit of funds. The issuer agrees to pay the amount deposited plus interest to the bearer of the receipt on the date specified on the certificate. The certificate usually can be traded in the secondary market prior to maturity. Bankers' acceptances typically arise from short-term credit arrangements designed to enable businesses to obtain funds to finance commercial transactions. Generally, an acceptance is a time draft drawn on a bank by an exporter or an importer to obtain a stated amount of funds to pay for specific merchandise. The draft is then "accepted" by a bank that, in effect, unconditionally guarantees to pay the face value of the instrument on its maturity date. The acceptance may then be held by the accepting bank as an earning asset or it may be sold in the secondary market at the going rate of discount for a specific maturity. Although maturities for acceptances can be as long as 270 days, most acceptances have maturities of six months or less.

Commercial Paper

The Fund may purchase commercial paper. Commercial paper consists of short-term (usually from 1 to 270 days) unsecured promissory notes issued by corporations in order to finance their current operations. It may be secured by letters of credit, a surety bond or other forms of collateral. Commercial paper is usually repaid at maturity by the issuer from the proceeds of the issuance of new commercial paper. As a result, investment in commercial paper is subject to the risk the issuer cannot issue enough new commercial paper to satisfy its outstanding commercial paper, also known as rollover risk. Commercial paper may become illiquid or may suffer from reduced liquidity in certain circumstances. Like all fixed income securities, commercial paper prices are susceptible to fluctuations in interest rates. If interest rates rise, commercial paper prices will decline. The short-term nature of a commercial paper investment

makes it less susceptible to interest rate risk than many other fixed income securities because interest rate risk typically increases as maturity lengths increase. Commercial paper tends to yield smaller returns than longer-term corporate debt because securities with shorter maturities typically have lower effective yields than those with longer maturities. As with all fixed income securities, there is a chance that the issuer will default on its commercial paper obligation.

Time Deposits and Variable Rate Notes

The Fund may invest in fixed time deposits, whether or not subject to withdrawal penalties.

The commercial paper obligations which the Fund may buy are unsecured and may include variable rate notes. The nature and terms of a variable rate note (i.e., a "Master Note") permit the Fund to invest fluctuating amounts at varying rates of interest pursuant to a direct arrangement between the Fund as Lender, and the issuer, as borrower. It permits daily changes in the amounts borrowed. The Fund has the right at any time to increase, up to the full amount stated in the note agreement, or to decrease the amount outstanding under the note. The issuer may prepay at any time and without penalty any part of or the full amount of the note. The note may or may not be backed by one or more bank letters of credit. Because these notes are direct lending arrangements between the Fund and the issuer, it is not generally contemplated that they will be traded; moreover, there is currently no secondary market for them. Except as specifically provided in the Prospectus, there is no limitation on the type of issuer from whom these notes may be purchased; however, in connection with such purchase and on an ongoing basis, the Adviser or any sub-advisers will consider the earning power, cash flow and other liquidity ratios of the issuer, and its ability to pay principal and interest on demand, including a situation in which all holders of such notes made demand simultaneously. Variable rate notes are subject to the Fund's investment restriction on illiquid securities unless such notes can be put back to the issuer on demand within seven days.

Insured Bank Obligations

The Fund may invest in insured bank obligations. The Federal Deposit Insurance Corporation ("FDIC") insures the deposits of federally insured banks and savings and loan associations (collectively referred to as "banks") up to \$250,000. The Fund may purchase bank obligations that are fully insured as to principal by the FDIC. Currently, to remain fully insured as to principal, these investments must be limited to \$250,000 per bank; if the principal amount and accrued interest together exceed \$250,000, the excess principal and accrued interest will not be insured. Insured bank obligations may have limited marketability.

LIBOR

Changes in the level of LIBOR will affect the amount of interest payable on the LIBOR-based floating rate debt instruments, and it is impossible to predict whether LIBOR will rise or fall. A decline in the level of LIBOR would likely result in a reduction of interest collections on such debt instruments, which would have an adverse effect on the return of the Fund. Some floating rate debt instruments held by the Fund may have LIBOR floors (or minimum interest rate to which the spread or margin is added, to calculate the debt instrument's overall interest rate), but there is no guarantee that any such LIBOR floor will fully mitigate the risk of falling LIBOR.

The UK Financial Conduct Authority (the "FCA") and LIBOR's administrator, ICE Benchmark Administration (the "IBA"), have ceased publishing most LIBOR settings and announced that a majority of U.S. dollar LIBOR settings will no longer be published after June 30, 2023. Not all LIBOR-based instruments have an alternative to LIBOR and there is significant uncertainty regarding the effectiveness of alternative methodologies and the potential for market instability. These matters may result in a sudden or prolonged increase or decrease in reported benchmark rates, benchmark rates being more volatile than they have been in the past, and/or fewer debt instruments utilizing given benchmark rates as a component of interest payments. Additionally, in connection with the adoption of another benchmark as a replacement for LIBOR in a debt instrument's documentation, the interest rate (or method for

calculating the interest rate) applicable to that debt instrument may be modified to account for differences between LIBOR and the applicable replacement benchmark used to calculate the rate of interest payable in respect of that instrument, which modification may be based on industry-accepted spread adjustments or recommendations from various governmental and non-governmental bodies. The Fund cannot reasonably estimate the impact of the anticipated transition away from LIBOR at this time. If the LIBOR replacement rate is lower than market expectations, there could be an adverse impact on the value of debt instruments with floating or fixed-to-floating rate coupons and, in turn, a material adverse impact on the value of the Fund.

The transition away from LIBOR may affect the cost of capital, may require amending or restructuring debt instruments and related hedging arrangements for the Fund and its portfolio companies, and may impact the liquidity and/or value of floating rate instruments based on LIBOR that are held or may be held by the Fund in the future, which may result in additional costs or adversely affect the Fund's liquidity, results of operations, and financial condition. Any such effects of the transition away from LIBOR, as well as other unforeseen effects, could result in losses for the Funds. Since the usefulness of LIBOR as a benchmark could also deteriorate during the transition period, effects could occur at any time.

Repurchase Agreements

The Fund may enter into repurchase agreements. In a repurchase agreement, an investor (such as the Fund) purchases a security (known as the "underlying security") from a securities dealer or bank. Any such dealer or bank must be deemed creditworthy by the Adviser or any sub-adviser. At that time, the bank or securities dealer agrees to repurchase the underlying security at a mutually agreed upon price on a designated future date. The repurchase price may be higher than the purchase price, the difference being income to the Fund, or the purchase and repurchase prices may be the same, with interest at an agreed upon rate due to the Fund on repurchase. In either case, the income to the Fund generally will be unrelated to the interest rate on the underlying securities. Repurchase agreements must be "fully collateralized," in that the market value of the underlying securities (including accrued interest) must at all times be equal to or greater than the repurchase price. Therefore, a repurchase agreement can be considered a loan collateralized by the underlying securities.

Repurchase agreements are generally for a short period of time, often less than a week, and will generally be used by the Fund to invest excess cash or as part of a temporary defensive strategy. Repurchase agreements that do not provide for payment within seven days will be treated as illiquid securities. In the event of a bankruptcy or other default by the seller of a repurchase agreement, a Fund could experience both delays in liquidating the underlying security and losses. These losses could result from: (a) possible decline in the value of the underlying security while the Fund is seeking to enforce its rights under the repurchase agreement; (b) possible reduced levels of income or lack of access to income during this period; and (c) expenses of enforcing its rights.

Reverse Repurchase Agreements

In a reverse repurchase agreement, the Fund sells portfolio securities to another party and agrees to repurchase the securities at an agreed-upon price and date. Reverse repurchase agreements involve the risk that the other party will fail to return the securities in a timely manner, or at all, which may result in losses to the Fund. The Fund could lose money if it is unable to recover the securities and the value of the collateral held by the Fund is less than the value of the securities. These events could also trigger adverse tax consequences to the Fund. Reverse repurchase agreements also involve the risk that the market value of the securities sold will decline below the price at which the Fund is obligated to repurchase them. Reverse repurchase agreements may increase fluctuations in the Fund's NAV and may be viewed as a form of borrowing by the Fund.

Equity Securities

Equity securities in which the Fund invests include interests in pooled investment vehicles, common stocks, preferred stocks, securities convertible into common stocks, such as convertible bonds, warrants, rights and options and related securities. The value of equity securities varies in response to many factors, including the activities and financial condition of individual companies, the business market in which individual companies compete and general market and economic conditions. Equity securities fluctuate in value, often based on factors unrelated to the value of the issuer of the securities, and such fluctuations can be significant.

Common Stock

Common stock represents an equity (ownership) interest in a company, and usually possesses voting rights and earns dividends. Dividends on common stock are not fixed but are declared at the discretion of the issuer. Common stock generally represents the riskiest investment in a company. In addition, common stock generally has the greatest appreciation and depreciation potential because increases and decreases in earnings are usually reflected in a company's stock price.

Preferred Stock

The Fund may invest in preferred stock with no minimum credit rating. Preferred stock is a class of stock having a preference over common stock as to the payment of dividends and the recovery of investment should a company be liquidated, although preferred stock is usually junior to the debt securities of the issuer. Preferred stock typically does not possess voting rights and its market value may change based on changes in interest rates.

The fundamental risk of investing in common and preferred stock is the risk that the value of the stock might decrease. Stock values fluctuate in response to the activities of an individual company or in response to general market and/or economic conditions. Historically, common stocks have provided greater long-term returns and have entailed greater short-term risks than preferred stocks, fixed-income securities and money market investments. The market value of all securities, including common and preferred stocks, is based upon the market's perception of value and not necessarily the book value of an issuer or other objective measures of a company's worth.

Convertible Securities

The Fund may invest in convertible securities with no minimum credit rating. Convertible securities include fixed income securities that may be exchanged or converted into a predetermined number of shares of the issuer's underlying common stock at the option of the holder during a specified period. Convertible securities may take the form of convertible preferred stock, convertible bonds or debentures, units consisting of "usable" bonds and warrants or a combination of the features of several of these securities. Convertible securities are senior to common stocks in an issuer's capital structure, but are usually subordinated to similar non-convertible securities. While providing a fixed-income stream (generally higher in yield than the income derivable from common stock but lower than that afforded by a similar nonconvertible security), a convertible security also gives an investor the opportunity, through its conversion feature, to participate in the capital appreciation of the issuing company depending upon a market price advance in the convertible security's underlying common stock.

Warrants

The Fund may invest in warrants. Warrants are options to purchase common stock at a specific price (usually at a premium above the market value of the optioned common stock at issuance) valid for a specific period of time. Warrants may have a life ranging from less than one year to twenty years, or they may be perpetual. However, most

warrants have expiration dates after which they are worthless. In addition, a warrant is worthless if the market price of the common stock does not exceed the warrant's exercise price during the life of the warrant. Warrants have no voting rights, pay no dividends, and have no rights with respect to the assets of the corporation issuing them. The percentage increase or decrease in the market price of the warrant may tend to be greater than the percentage increase or decrease in the market price of the optioned common stock.

Depository Receipts

The Fund may invest in sponsored and unsponsored American Depositary Receipts ("ADRs"), which are receipts issued by an American bank or trust company evidencing ownership of underlying securities issued by a foreign issuer. ADRs, in registered form, are designed for use in U.S. securities markets. Unsponsored ADRs may be created without the participation of the foreign issuer. Holders of these ADRs generally bear all the costs of the ADR facility, whereas foreign issuers typically bear certain costs in a sponsored ADR. The bank or trust company depository of an unsponsored ADR may be under no obligation to distribute shareholder communications received from the foreign issuer or to pass through voting rights. Many of the risks described below regarding foreign securities apply to investments in ADRs.

Securities of Other Investment Companies

The Fund may invest in investment companies such as open-end funds (mutual funds), closed-end funds, and exchange traded funds (also referred to as "Underlying Funds"). The 1940 Act provides that the mutual funds may not: (1) purchase more than 3% of an investment company's outstanding shares; (2) invest more than 5% of its assets in any single such investment company (the "5% Limit"), and (3) invest more than 10% of its assets in investment companies overall (the "10% Limit"), unless: (i) the underlying investment company and/or the Fund has received an order for exemptive relief from such limitations from the Securities and Exchange Commission ("SEC"); and (ii) the underlying investment company and the Fund take appropriate steps to comply with any conditions in such order.

The Fund may exceed these statutory limits when permitted by SEC order or other applicable law or regulatory guidance, such as is the case with many ETFs. The SEC recently adopted certain regulatory changes and took other actions related to the ability of an investment company to invest in the securities of another investment company. These changes include, among other things, the rescission of certain SEC exemptive orders permitting investments in excess of the statutory limits and the withdrawal of certain related SEC staff no-action letters, and the adoption of Rule 12d1-4 under the 1940 Act. Rule 12d1-4 permits the Fund to invest in other investment companies beyond the statutory limits, subject to certain conditions. The rescission of the applicable exemptive orders and the withdrawal of the applicable no-action letters is effective on January 19, 2022. After such time, an investment company will no longer be able to rely on the aforementioned exemptive orders and no-action letters, and will be subject instead to Rule 12d1-4 and other applicable rules under Section 12(d)(1).

In addition, Section 12(d)(1)(F) of the Investment Company Act of 1940, as amended provides that the provisions of paragraph 12(d)(1) shall not apply to securities purchased or otherwise acquired by the Fund if (i) immediately after such purchase or acquisition not more than 3% of the total outstanding stock of such registered investment company is owned by the Fund and all affiliated persons of the Fund; and (ii) the Fund has not, and is not proposing to offer or sell any security issued by it through a principal underwriter or otherwise at a public or offering price which includes a sales load of more than 1 ½% percent. An investment company that issues shares to the Fund pursuant to paragraph 12(d)(1)(F) shall not be required to redeem its shares in an amount exceeding 1% of such investment company's total outstanding shares in any period of less than thirty days. The Fund (or the Adviser acting on behalf of the Fund) must comply with the following voting restrictions: when the Fund exercises voting rights, by proxy or otherwise, with respect to investment companies owned by the Fund, the Fund will either seek instruction from the Fund's shareholders with regard to the voting of all proxies and vote in accordance with such instructions, or vote the shares held by the Fund in the same proportion as the vote of all other holders of such security.

Further, the Fund may rely on Rule 12d1-3, which allows unaffiliated mutual funds to exceed the 5% Limitation and the 10% Limitation, pursuant to Section 12(d)(1)(F) provided the aggregate sales loads any investor pays (i.e., the combined distribution expenses of both the acquiring fund and the acquired funds) does not exceed the limits on sales loads established by the FINRA for funds of funds.

Under certain circumstances an Underlying Fund may determine to make payment of a redemption by the Fund wholly or partly by a distribution in kind of securities from its portfolio, in lieu of cash, in conformity with the rules of the Securities and Exchange Commission ("SEC"). In such cases, the Fund may hold securities distributed by an Underlying Fund until the Adviser determines that it is appropriate to dispose of such securities.

Investment decisions by the investment advisors of the Underlying Funds are made independently of the Fund and its Adviser. Therefore, the investment advisor of one Underlying Fund may be purchasing shares of the same issuer whose shares are being sold by the investment advisor of another such fund. The result would be an indirect expense to the Fund without accomplishing any investment purpose. Because other investment companies employ an investment adviser, such investments by the Fund may cause shareholders to bear duplicate fees.

Closed-End Investment Companies

The Fund may invest its assets in "closed-end" investment companies (or "closed-end funds"), subject to the investment restrictions set forth above. Shares of closed-end funds are typically offered to the public in a one-time initial public offering by a group of underwriters who retain a spread or underwriting commission of between 4% or 6% of the initial public offering price. Such securities are then listed for trading on the New York Stock Exchange, the National Association of Securities Dealers Automated Quotation System (commonly known as "NASDAQ") and, in some cases, may be traded in other over-the-counter markets. Because the shares of closed-end funds cannot be redeemed upon demand to the issuer like the shares of an open-end investment company (such as the Fund), investors seek to buy and sell shares of closed-end funds in the secondary market.

The Fund generally will purchase shares of closed-end funds only in the secondary market. The Fund will incur normal brokerage costs on such purchases similar to the expenses the Fund would incur for the purchase of securities of any other type of issuer in the secondary market. The may, however, also purchase securities of a closed-end fund in an initial public offering when, in the opinion of the Adviser or any sub-adviser, based on a consideration of the nature of the closed-end fund's proposed investments, the prevailing market conditions and the level of demand for such securities, they represent an attractive opportunity for growth of capital. The initial offering price typically will include a dealer spread, which may be higher than the applicable brokerage cost if the Fund purchased such securities in the secondary market.

The shares of many closed-end funds, after their initial public offering, frequently trade at a price per share, which is less than the net asset value per share, the difference representing the "market discount" of such shares. This market discount may be due in part to the investment objective of long-term appreciation, which is sought by many closed-end funds, as well as to the fact that the shares of closed-end funds are not redeemable by the holder upon demand to the issuer at the next determined net asset value but rather are subject to the principles of supply and demand in the secondary market. A relative lack of secondary market purchasers of closed-end fund shares also may contribute to such shares trading at a discount to their net asset value.

The Fund may invest in shares of closed-end funds that are trading at a discount to net asset value or at a premium to net asset value. There can be no assurance that the market discount on shares of any closed-end fund purchased by the Fund will ever decrease. In fact, it is possible that this market discount may increase and the Fund may suffer realized or unrealized capital losses due to further decline in the market price of the securities of such closed-end funds, thereby adversely affecting the net asset value of the Fund's shares. Similarly, there can be no

assurance that any shares of a closed-end fund purchased by the Fund at a premium will continue to trade at a premium or that the premium will not decrease subsequent to a purchase of such shares by the Fund.

Closed-end funds may issue senior securities (including preferred stock and debt obligations) for the purpose of leveraging the closed-end fund's common shares in an attempt to enhance the current return to such closed-end fund's common shareholders. The Fund's investment in the common shares of closed-end funds that are financially leveraged may create an opportunity for greater total return on its investment, but at the same time may be expected to exhibit more volatility in market price and net asset value than an investment in shares of investment companies without a leveraged capital structure.

Open-end Investment Companies

Under certain circumstances an underlying open-end fund may determine to make payment of a redemption by the Fund wholly or partly by a distribution in kind of securities from its portfolio, in lieu of cash, in conformity with the rules of the SEC. In such cases, the Fund may hold securities distributed by an underlying fund until the Adviser or any sub-adviser determines that it is appropriate to dispose of such securities.

Investment decisions by the investment advisers of the underlying fund(s) are made independently of the Fund and the Adviser or any sub-adviser. Therefore, the investment adviser of one underlying fund may be purchasing shares of the same issuer whose shares are being sold by the investment adviser of another such fund. The result would be an indirect expense to the Fund without accomplishing any investment purpose.

Exchange Traded Funds

ETFs are generally passive funds that track their related index and have the flexibility of trading like a security. They are managed by professionals and provide the investor with diversification, cost and tax efficiency, liquidity, marginability, are useful for hedging, have the ability to go long and short, and some provide quarterly dividends. Additionally, some ETFs are unit investment trusts ("UITs"). ETFs typically have two markets. The primary market is where institutions swap "creation units" in block-multiples of, for example, 50,000 shares for in-kind securities and cash in the form of dividends. The secondary market is where individual investors can trade as little as a single share during trading hours on the exchange. This is different from open-ended mutual funds that are traded after hours once the net asset value ("NAV") is calculated. ETFs share many similar risks with open-end and closed-end funds.

High Yield Securities

The Fund may invest in high yield securities. High yield, high risk bonds are securities that are generally rated below investment grade by the primary rating agencies (BB+ or lower by S&P and Ba1 or lower by Moody's). Other terms used to describe such securities include "lower rated bonds," "non-investment grade bonds," "below investment grade bonds," and "junk bonds." These securities are considered to be high-risk investments. The risks include the following:

Greater Risk of Loss. These securities are regarded as predominately speculative. There is a greater risk that issuers of lower rated securities will default than issuers of higher rated securities. Issuers of lower rated securities generally are less creditworthy and may be highly indebted, financially distressed, or bankrupt. These issuers are more vulnerable to real or perceived economic changes, political changes or adverse industry developments. In addition, high yield securities are frequently subordinated to the prior payment of senior indebtedness. If an issuer fails to pay principal or interest, the Fund would experience a decrease in income and a decline in the market value of its investments.

Sensitivity to Interest Rate and Economic Changes. The income and market value of lower-rated securities may fluctuate more than higher rated securities. Although non-investment grade securities tend to be less sensitive to interest rate changes than investment grade securities, non-investment grade securities are more sensitive to short-term corporate, economic and market developments. During periods of economic uncertainty and change, the market price of the investments in lower-rated securities may be volatile. The default rate for high yield bonds tends to be cyclical, with defaults rising in periods of economic downturn.

Valuation Difficulties. It is often more difficult to value lower rated securities than higher rated securities. If an issuer's financial condition deteriorates, accurate financial and business information may be limited or unavailable. In addition, the lower rated investments may be thinly traded and there may be no established secondary market. Because of the lack of market pricing and current information for investments in lower rated securities, valuation of such investments is much more dependent on judgment than is the case with higher rated securities.

Liquidity. There may be no established secondary or public market for investments in lower rated securities. Such securities are frequently traded in markets that may be relatively less liquid than the market for higher rated securities. In addition, relatively few institutional purchasers may hold a major portion of an issue of lower-rated securities at times. As a result, the Fund may be required to sell investments at substantial losses or retain them indefinitely when an issuer's financial condition is deteriorating.

Credit Quality. Credit quality of non-investment grade securities can change suddenly and unexpectedly, and even recently-issued credit ratings may not fully reflect the actual risks posed by a particular high-yield security.

New Legislation. Future legislation may have a possible negative impact on the market for high yield, high risk bonds. As an example, in the late 1980s, legislation required federally-insured savings and loan associations to divest their investments in high yield, high risk bonds. New legislation, if enacted, could have a material negative effect on the Fund's investments in lower rated securities. High yield, high risk investments may include the following:

Straight Fixed-Income Debt Securities. These include bonds and other debt obligations that bear a fixed or variable rate of interest payable at regular intervals and have a fixed or resettable maturity date. The particular terms of such securities vary and may include features such as call provisions and sinking funds.

Zero-Coupon Debt Securities. These do not pay periodic interest but are issued at a discount from their value at maturity. When held to maturity, their entire return equals the difference between their issue price and their maturity value.

Zero-Fixed-Coupon Debt Securities. These are zero-coupon debt securities that convert on a specified date to periodic interest-paying debt securities.

Pay-in-Kind Bonds. These are bonds which allow the issuer, at its option, to make current interest payments on the bonds either in cash or in additional bonds. These are bonds are typically sold without registration under the Securities Act of 1933, as amended ("Securities Act"), usually to a relatively small number of institutional investors.

Convertible Securities. These are bonds or preferred stock that may be converted to common stock.

Preferred Stock. These are stocks that generally pay a dividend at a specified rate and have preference over common stock in the payment of dividends and in liquidation.

Loan Participations and Assignments. These are participations in, or assignments of all or a portion of loans to corporations or to governments, including governments of less developed countries ("LDCs").

Securities Issued in Connection with Reorganizations and Corporate Restructurings. In connection with reorganizing or restructuring of an issuer, an issuer may issue common stock or other securities to holders of its debt securities. The Fund may hold such common stock and other securities even if it does not invest in such securities.

Municipal Government Obligations

In general, municipal obligations are debt obligations issued by or on behalf of states, territories and possessions of the United States (including the District of Columbia) and their political subdivisions, agencies and instrumentalities. Municipal obligations generally include debt obligations issued to obtain funds for various public purposes. Certain types of municipal obligations are issued in whole or in part to obtain funding for privately operated facilities or projects. Municipal obligations include general obligation bonds, revenue bonds, industrial development bonds, notes and municipal lease obligations. Municipal obligations also include additional obligations, the interest on which is exempt from federal income tax that may become available in the future as long as the Board of the Funds determines that an investment in any such type of obligation is consistent with the Fund's investment objectives. Municipal obligations may be fully or partially backed by local government, the credit of a private issuer, current or anticipated revenues from a specific project or specific assets or domestic or foreign entities providing credit support such as letters of credit, guarantees or insurance.

Bonds and Notes

General obligation bonds are secured by the issuer's pledge of its full faith, credit and taxing power for the payment of interest and principal. Revenue bonds are payable only from the revenues derived from a project or facility or from the proceeds of a specified revenue source. Industrial development bonds are generally revenue bonds secured by payments from and the credit of private users. Municipal notes are issued to meet the short-term funding requirements of state, regional and local governments. Municipal notes include tax anticipation notes, bond anticipation notes, revenue anticipation notes, tax and revenue anticipation notes, construction loan notes, short-term discount notes, tax-exempt commercial paper, demand notes and similar instruments.

Municipal Lease Obligations

Municipal lease obligations may take the form of a lease, an installment purchase or a conditional sales contract. They are issued by state and local governments and authorities to acquire land, equipment and facilities, such as vehicles, telecommunications and computer equipment and other capital assets. The Fund may invest in funds that purchase these lease obligations directly, or it may purchase participation interests in such lease obligations. States have different requirements for issuing municipal debt and issuing municipal leases. Municipal leases are generally subject to greater risks than general obligation or revenue bonds because they usually contain a "non-appropriation" clause, which provides that the issuer is not obligated to make payments on the obligation in future years unless funds have been appropriated for this purpose each year. Such non-appropriation clauses are required to avoid the municipal lease obligations from being treated as debt for state debt restriction purposes. Accordingly, such obligations are subject to "non-appropriation" risk. Municipal leases may be secured by the underlying capital asset and it may be difficult to dispose of any such asset in the event of non-appropriation or other default.

Foreign Securities

General

The Fund may invest in foreign securities including ETFs and other investment companies that hold a portfolio of foreign securities. Investing in securities of foreign companies and countries involves certain considerations and risks that are not typically associated with investing in U.S. government securities and securities of domestic companies. There may be less publicly available information about a foreign issuer than a domestic one, and foreign

companies are not generally subject to uniform accounting, auditing and financial standards and requirements comparable to those applicable to U.S. companies. There may also be less government supervision and regulation of foreign securities exchanges, brokers and listed companies than exists in the United States. Interest and dividends paid by foreign issuers may be subject to withholding and other foreign taxes, which may decrease the net return on such investments as compared to dividends and interest paid to the Fund by domestic companies or the U.S. government. There may be the possibility of expropriations, seizure or nationalization of foreign deposits, confiscatory taxation, political, economic or social instability or diplomatic developments that could affect assets of the Fund held in foreign countries. Finally, the establishment of exchange controls or other foreign governmental laws or restrictions could adversely affect the payment of obligations.

To the extent the Fund's currency exchange transactions do not fully protect the Fund against adverse changes in currency exchange rates, decreases in the value of currencies of the foreign countries in which the Fund will invest relative to the U.S. dollar will result in a corresponding decrease in the U.S. dollar value of the Fund's assets denominated in those currencies (and possibly a corresponding increase in the amount of securities required to be liquidated to meet distribution requirements). Conversely, increases in the value of currencies of the foreign countries in which the Fund invests relative to the U.S. dollar will result in a corresponding increase in the U.S. dollar value of the Fund's assets (and possibly a corresponding decrease in the amount of securities to be liquidated).

BREXIT

In June of 2016, the United Kingdom (the "UK") approved a referendum to leave the European Union (the "EU"), commonly referred to as "Brexit," which sparked depreciation in the value of the British pound and heightened risk of continued worldwide economic volatility. The UK withdrew from the EU on January 31, 2020. It is possible that measures could be taken to revoke the issue of the withdrawal, or that regions of the UK could seek to separate and remain a part of the EU. As a result of the withdrawal, a Fund may be exposed to volatile trading markets and significant and unpredictable currency fluctuations over a short period of time, and potentially lower economic growth in the UK, Europe and globally. Securities issued by companies domiciled in the UK could be subject to changing regulatory and tax regimes. Banking and financial services companies that operate in the UK or EU could be disproportionately impacted by these actions. Further insecurity in EU membership or the abandonment of the euro could exacerbate market and currency volatility and negatively impact a Fund's investments in securities issued by companies located in EU countries. The impact of these actions, especially if they occur in a disorderly fashion, is not clear but could be significant and far-reaching. The considerations noted above generally are intensified for investments in developing countries. Developing countries may have relatively unstable governments, economies based on only a few industries and securities markets that trade a small number of securities.

Emerging Markets Securities

The Fund may purchase securities of emerging market issuers, ETFs and closed-end funds that invest in emerging market securities. Investing in emerging market securities imposes risks different from, or greater than, risks of investing in foreign developed countries. These risks include: smaller market capitalization of securities markets, which may suffer periods of relative illiquidity; significant price volatility; restrictions on foreign investment; possible repatriation of investment income and capital. In addition, foreign investors may be required to register the proceeds of sales; future economic or political crises could lead to price controls, forced mergers, expropriation or confiscatory taxation, seizure, nationalization, or creation of government monopolies. The currencies of emerging market countries may experience significant declines against the U.S. dollar, and devaluation may occur subsequent to investments in these currencies by the Fund. Inflation and rapid fluctuations in inflation rates have had, and may continue to have, negative effects on the economies and securities markets of certain emerging market countries.

Additional risks of emerging markets securities may include: greater social, economic and political uncertainty and instability; more substantial governmental involvement in the economy; less governmental supervision and regulation; unavailability of currency hedging techniques; companies that are newly organized and small; differences in auditing and financial reporting standards, which may result in unavailability of material information about issuers; and less developed legal systems. In addition, emerging securities markets may have different clearance and settlement procedures, which may be unable to keep pace with the volume of securities transactions or otherwise make it difficult to engage in such transactions. Settlement problems may cause the Fund to miss attractive investment opportunities, hold a portion of its assets in cash pending investment, or be delayed in disposing of a portfolio security. Such a delay could result in possible liability to a purchaser of the security.

Derivative Instruments

The Fund expects to use a number of derivative instruments as part of its investment strategies. Generally, derivatives are financial contracts whose value depends upon, or is derived from, the value of an underlying asset, reference rate or index, and may relate to stocks, bonds, interest rates, currencies or currency exchange rates, commodities and related indexes. The Adviser may decide not to employ any of these strategies and there is no assurance that any derivatives strategy used by the Fund will succeed. Examples of derivative instruments that the Fund may use include (but are not limited to) futures contracts, options contracts, swap transactions and forward currency contracts. Derivatives involve special risks, including possible default by the other party to the transaction, illiquidity and, to the extent the Adviser's or sub adviser's view as to certain market movements is incorrect, the risk that the use of derivatives could result in significantly greater losses than if they had not been used. Recently, several broker-dealers and other financial institutions have experienced extreme financial difficulty, sometimes resulting in the bankruptcy of the institution. There can be no assurance that the Fund's counterparties will not experience similar difficulties, possibly resulting in losses to the Fund. Losses resulting from the use of derivatives will reduce the Fund's NAV, and possibly income, and the losses may be significantly greater than if derivatives had not been used. When used, derivatives may increase the amount and affect the timing and character of taxable distributions paid to shareholders.

Futures Contracts

A futures contract provides for the future sale by one party and purchase by another party of a specified amount of a specific financial instrument (e.g., units of a stock index) for a specified price, date, time and place designated at the time the contract is made. Brokerage fees are paid when a futures contract is bought or sold and margin deposits must be maintained. Entering into a contract to buy is commonly referred to as buying or purchasing a contract or holding a long position. Entering into a contract to sell is commonly referred to as selling a contract or holding a short position.

Unlike when the Fund purchases or sells a security, no price would be paid or received by the Fund upon the purchase or sale of a futures contract. Upon entering into a futures contract, and to maintain the Fund's open positions in futures contracts, the Fund would be required to deposit with its custodian or futures broker in a segregated account in the name of the futures broker an amount of cash, U.S. government securities, suitable money market instruments, or other liquid securities, known as "initial margin." The margin required for a particular futures contract is set by the exchange on which the contract is traded, and may be significantly modified from time to time by the exchange during the term of the contract. Futures contracts are customarily purchased and sold on margins that may range upward from less than 5% of the value of the contract being traded.

If the price of an open futures contract changes (by increase in underlying instrument or index in the case of a sale or by decrease in the case of a purchase) so that the loss on the futures contract reaches a point at which the margin on deposit does not satisfy margin requirements, the broker will require an increase in the margin. However, if

the value of a position increases because of favorable price changes in the futures contract so that the margin deposit exceeds the required margin, the broker will pay the excess to the Fund.

These subsequent payments, called "variation margin," to and from the futures broker, are made on a daily basis as the price of the underlying assets fluctuate making the long and short positions in the futures contract more or less valuable, a process known as "marking to the market." The Fund expects to earn interest income on its margin deposits.

Although certain futures contracts, by their terms, require actual future delivery of and payment for the underlying instruments, in practice most futures contracts are usually closed out before the delivery date. Closing out an open futures contract purchase or sale is effected by entering into an offsetting futures contract sale or purchase, respectively, for the same aggregate amount of the identical underlying instrument or index and the same delivery date. If the offsetting purchase price is less than the original sale price, the Fund realizes a gain; if it is more, the Fund realizes a loss. Conversely, if the offsetting sale price is more than the original purchase price, the Fund realizes a gain; if it is less, the Fund realizes a loss. The transaction costs must also be included in these calculations. There can be no assurance, however, that the Fund will be able to enter into an offsetting transaction with respect to a particular futures contract at a particular time. If the Fund is not able to enter into an offsetting transaction, the Fund will continue to be required to maintain the margin deposits on the futures contract.

For example, one contract in the Financial Times Stock Exchange 100 Index future is a contract to buy 25 pounds sterling multiplied by the level of the UK Financial Times 100 Share Index on a given future date. Settlement of a stock index futures contract may or may not be in the underlying instrument or index. If not in the underlying instrument or index, then settlement will be made in cash, equivalent over time to the difference between the contract price and the actual price of the underlying asset at the time the stock index futures contract expires.

The Fund does not intend to engage in these transactions for speculative purposes but only in furtherance of its investment objective.

The Fund will purchase securities on a when-issued, forward commitment or delayed settlement basis only with the intention of completing the transaction. If deemed advisable as a matter of investment strategy, however, the Fund may dispose of or renegotiate a commitment after it is entered into, and may sell securities it has committed to purchase before those securities are delivered to the Fund on the settlement date. In these cases the Fund may realize a taxable capital gain or loss. When the Fund engages in when-issued, forward commitment and delayed settlement transactions, it relies on the other party to consummate the trade. Failure of such party to do so may result in the Fund incurring a loss or missing an opportunity to obtain a price credited to be advantageous.

The market value of the securities underlying a when-issued purchase, forward commitment to purchase securities, or a delayed settlement and any subsequent fluctuations in their market value is taken into account when determining the market value of the Fund starting on the day the Fund agrees to purchase the securities. The Fund does not earn interest on the securities it has committed to purchase until it has paid for and delivered on the settlement date.

Options on Futures Contracts

The Fund may purchase and sell options on the same types of futures in which it may invest. Options on futures are similar to options on underlying instruments except that options on futures give the purchaser the right, in return for the premium paid, to assume a position in a futures contract (a long position if the option is a call and a short position if the option is a put), rather than to purchase or sell the futures contract, at a specified exercise price at any time during the period of the option. Upon exercise of the option, the delivery of the futures position by the writer of the option to the holder of the option will be accompanied by the delivery of the accumulated balance in the writer's futures margin account which represents the amount by which the market price of the futures contract, at exercise, exceeds

(in the case of a call) or is less than (in the case of a put) the exercise price of the option on the futures contract. Purchasers of options who fail to exercise their options prior to the exercise date suffer a loss of the premium paid.

Forward Trading

The Fund may trade in spot and forward contracts on currencies. The trading of over-the-counter instruments, subjects the Fund to a variety of risks including: (1) counterparty risk; (2) basis risk; (3) interest rate risk; (4) settlement risk; (5) legal risk; and (6) operational risk. Counterparty risk is the risk that the Fund's counterparties might default on their obligation to pay or perform generally on their obligations. The over-the-counter markets and some foreign markets are "principals' markets." That means that performance of the contract is the responsibility only of the individual firm or member on the other side of the trade and not any exchange or clearing corporation. Such "counterparty risk" is accentuated for contracts with longer maturities where events may intervene to prevent settlement, or where the Fund has concentrated its transactions with a single or small group of counterparties. Basis risk is the risk attributable to the movements in the spread between the derivative contract price and the future price of the underlying instrument. Interest rate risk is the general risk associated with movements in interest rates. Settlement risk is the risk that a settlement in a transfer system does not take place as expected. Legal risk is the risk that a transaction proves unenforceable in law or because it has been inadequately documented. Operational risk is the risk of unexpected losses arising from deficiencies in a firm's management information, support and control systems and procedures. Transactions in over-the-counter derivatives may involve other risks as well, as there is no exchange market on which to close out an open position. It may be impossible to liquidate an existing position, to assess the value of a position or to assess the exposure to risk.

Swap Transactions

A swap transaction is an unregulated, individually negotiated agreement (typically with a bank, a brokerage firm or other financial institution as counterparty) to exchange two streams of payments (for example, an exchange of floating rate payments for fixed rate payments with respect to a notional amount of principal). The Fund may enter into interest rate, currency, index, total return and other swap transactions. For example, a total return swap is an agreement to make payments of the total return from a specified asset or instrument (or a basket of such instruments) during the specified period, in return for payments equal to a fixed or floating rate of interest or the total return from another specified asset or instrument (such as the return of a managed futures portfolio or portfolios). Alternatively, a total return swap can be structured so that one party will make payments to the other party if the value of the relevant asset or instrument increases, but receive payments from the other party if the value of that asset or instrument decreases.

Swaps can be highly volatile and may have a considerable impact on the Fund's performance, as the potential gain or loss on any swap transaction is not subject to any fixed limit. The Fund's successful use of swap agreements will depend on the ability to predict correctly whether certain types of investments are likely to produce greater returns than other investments.

Securities Options

The Fund may purchase and write (*i.e.*, sell) put and call options. Such options may relate to particular securities or stock indices, and may or may not be listed on a domestic or foreign securities exchange and may or may not be issued by the Options Clearing Corporation. Options trading is a highly specialized activity that entails greater than ordinary investment risk. Options may be more volatile than the underlying instruments, and therefore, on a percentage basis, an investment in options may be subject to greater fluctuation than an investment in the underlying instruments themselves.

A call option for a particular security gives the purchaser of the option the right to buy, and the writer (seller) the obligation to sell, the underlying security at the stated exercise price at any time prior to the expiration of the option, regardless of the market price of the security. The premium paid to the writer is in consideration for undertaking the obligation under the option contract. A put option for a particular security gives the purchaser the right to sell the security at the stated exercise price at any time prior to the expiration date of the option, regardless of the market price of the security.

Stock index options are put options and call options on various stock indices. In most respects, they are identical to listed options on common stocks. The primary difference between stock options and index options occurs when index options are exercised. In the case of stock options, the underlying security, common stock, is delivered. However, upon the exercise of an index option, settlement does not occur by delivery of the securities comprising the index. The option holder who exercises the index option receives an amount of cash if the closing level of the stock index upon which the option is based is greater than, in the case of a call, or less than, in the case of a put, the exercise price of the option. This amount of cash is equal to the difference between the closing price of the stock index and the exercise price of the option expressed in dollars times a specified multiple. A stock index fluctuates with changes in the market value of the stocks included in the index. For example, some stock index options are based on a broad market index, such as the Standard & Poor's 500® Index or the Value Line Composite Index or a narrower market index, such as the Standard & Poor's 100®. Indices may also be based on an industry or market segment, such as the AMEX Oil and Gas Index or the Computer and Business Equipment Index. Options on stock indices are currently traded on the Chicago Board Options Exchange, the New York Stock Exchange, the American Stock Exchange, and NASDAQ PHLX.

The Fund's obligation to sell an instrument subject to a call option written by it, or to purchase an instrument subject to a put option written by it, may be terminated prior to the expiration date of the option by the Fund's execution of a closing purchase transaction, which is effected by purchasing on an exchange an option of the same series (*i.e.*, same underlying instrument, exercise price and expiration date) as the option previously written. A closing purchase transaction will ordinarily be effected to realize a profit on an outstanding option, to prevent an underlying instrument from being called, to permit the sale of the underlying instrument or to permit the writing of a new option containing different terms on such underlying instrument. The cost of such a liquidation purchase plus transactions costs may be greater than the premium received upon the original option, in which event the Fund will have paid a loss in the transaction. There is no assurance that a liquid secondary market will exist for any particular option. An option writer unable to effect a closing purchase transaction will not be able to sell the underlying instrument until the option expires or the optioned instrument is delivered upon exercise. In such circumstances, the writer will be subject to the risk of market decline or appreciation in the instrument during such period.

If an option purchased by the Fund expires unexercised, the Fund realizes a loss equal to the premium paid. If the Fund enters into a closing sale transaction on an option purchased by it, the Fund will realize a gain if the premium received by the Fund on the closing transaction is more than the premium paid to purchase the option, or a loss if it is less. If an option written by the Fund expires on the stipulated expiration date or if the Fund enters into a closing purchase transaction, it will realize a gain (or loss if the cost of a closing purchase transaction exceeds the net premium received when the option is sold). If an option written by the Fund is exercised, the proceeds of the sale will be increased by the net premium originally received and the Fund will realize a gain or loss.

Certain Risks Regarding Options

There are several risks associated with transactions in options. For example, there are significant differences between the securities and options markets that could result in an imperfect correlation between these markets, causing a given transaction not to achieve its objectives. In addition, a liquid secondary market for particular options, whether traded over-the-counter or on an exchange, may be absent for reasons which include the following: there may be insufficient trading interest in certain options; restrictions may be imposed by an exchange on opening transactions or closing transactions or both; trading halts, suspensions or other restrictions may be imposed with respect to particular classes or series of options or underlying securities or currencies; unusual or unforeseen circumstances may interrupt normal operations on an exchange; the facilities of an exchange or the Options Clearing Corporation may not at all times be adequate to handle current trading value; or one or more exchanges could, for economic or other reasons, decide or be compelled at some future date to discontinue the trading of options (or a particular class or series of options), in which event the secondary market on that exchange (or in that class or series of options) would cease to exist, although outstanding options that had been issued by the Options Clearing Corporation as a result of trades on that exchange would continue to be exercisable in accordance with their terms.

Successful use by the Fund of options on stock indices will be subject to the ability of the Adviser or any sub-adviser to correctly predict movements in the directions of the stock market. This requires different skills and techniques than predicting changes in the prices of individual securities. In addition, the Fund's ability to effectively hedge all or a portion of the securities in its portfolio, in anticipation of or during a market decline, through transactions in put options on stock indices, depends on the degree to which price movements in the underlying index correlate with the price movements of the securities held by the Fund. Inasmuch as the Fund's securities will not duplicate the components of an index, the correlation will not be perfect. Consequently, the Fund bears the risk that the prices of its securities being hedged will not move in the same amount as the prices of its put options on the stock indices. It is also possible that there may be a negative correlation between the index and the Fund's securities that would result in a loss on both such securities and the options on stock indices acquired by the Fund.

The hours of trading for options may not conform to the hours during which the underlying securities are traded. To the extent that the options markets close before the markets for the underlying securities, significant price and rate movements can take place in the underlying markets that cannot be reflected in the options markets. The purchase of options is a highly specialized activity that involves investment techniques and risks different from those associated with ordinary portfolio securities transactions. The purchase of stock index options involves the risk that the premium and transaction costs paid by the Fund in purchasing an option will be lost as a result of unanticipated movements in prices of the securities comprising the stock index on which the option is based.

There is no assurance that a liquid secondary market on an options exchange will exist for any particular option, or at any particular time, and for some options no secondary market on an exchange or elsewhere may exist. If the Fund is unable to close out a call option on securities that it has written before the option is exercised, the Fund may be required to purchase the optioned securities in order to satisfy its obligation under the option to deliver such securities. If the Fund is unable to effect a closing sale transaction with respect to options on securities that it has purchased, it would have to exercise the option in order to realize any profit and would incur transaction costs upon the purchase and sale of the underlying securities.

Cover for Options Positions

Transactions using options (other than options that the Fund has purchased) expose the Fund to an obligation to another party. The Fund will not enter into any such transactions unless it owns either (i) an offsetting ("covered") position in securities or other options or (ii) cash or liquid securities with a value sufficient at all times to cover its potential obligations not covered as provided in (i) above.

Dealer Options

The Fund may engage in transactions involving dealer options as well as exchange-traded options. Certain additional risks are specific to dealer options. While the Fund might look to a clearing corporation to exercise exchange-traded options, if the Fund were to purchase a dealer option it would need to rely on the dealer from which it purchased the option to perform if the option were exercised. Failure by the dealer to do so would result in the loss of the premium paid by the Fund as well as loss of the expected benefit of the transaction.

Exchange-traded options generally have a continuous liquid market while dealer options may not. Consequently, the Fund may generally be able to realize the value of a dealer option it has purchased only by exercising or reselling the option to the dealer who issued it. Similarly, when the Fund writes a dealer option, it may generally be able to close out the option prior to its expiration only by entering into a closing purchase transaction with the dealer to whom the Fund originally wrote the option. While the Fund will seek to enter into dealer options only with dealers who will agree to and which are expected to be capable of entering into closing transactions with the Fund, there can be no assurance that the Fund will at any time be able to liquidate a dealer option at a favorable price at any time prior to expiration. Unless the Fund, as a covered dealer call option writer, is able to effect a closing purchase transaction, it will not be able to liquidate securities (or other assets) used as cover until the option expires or is exercised. In the event of insolvency of the other party, the Fund may be unable to liquidate a dealer option. With respect to options written by the Fund, the inability to enter into a closing transaction may result in material losses to the Fund.

The Staff of the SEC has taken the position that purchased dealer options are illiquid securities. The Fund may treat the cover used for written dealer options as liquid if the dealer agrees that the Fund may repurchase the dealer option it has written for a maximum price to be calculated by a predetermined formula. In such cases, the dealer option would be considered illiquid only to the extent the maximum purchase price under the formula exceeds the intrinsic value of the option. Accordingly, the Fund will treat dealer options as subject to the Fund's limitation on illiquid securities. If the SEC changes its position on the liquidity of dealer options, the Fund's treatment of such instruments will change accordingly.

Spread Transactions

The Fund may purchase covered spread options from securities dealers. These covered spread options are not presently exchange-listed or exchange-traded. The purchase of a spread option gives the Fund the right to put securities that it owns at a fixed dollar spread or fixed yield spread in relationship to another security that the Fund does not own, but which is used as a benchmark. The risk to the Fund, in addition to the risks of dealer options described above, is the cost of the premium paid as well as any transaction costs. The purchase of spread options will be used to protect the Fund against adverse changes in prevailing credit quality spreads, *i.e.*, the yield spread between high quality and lower quality securities. This protection is provided only during the life of the spread options.

Credit Default Swaps

The Fund may enter into credit default swaps. In a credit default swap, one party makes a stream of payments to another party in exchange for the right to receive a specified return in the event of a default by a third party, typically an emerging country, on its obligation. The Fund may use credit default swaps to provide a measure of protection against defaults of sovereign issuers (i.e., to reduce risk where the Fund owns or has exposure to the sovereign issuer) and may use credit default swaps to take an active long or short position with respect to the likelihood of a particular issuer's default. In connection with these agreements, cash or liquid securities may be set aside as collateral by the Fund's custodian in accordance with the terms of the swap agreement. The Fund earns interest on cash set aside as collateral. Swaps are marked to market daily based upon quotations from market makers and the change in value, if any, is recorded as unrealized gain or loss. These financial instruments are not actively traded on financial markets. The values assigned to these instruments are based upon the best available information and because of the uncertainty of the valuation, these values may differ significantly from the values that would have been realized had a ready market for these instruments existed, and the differences could be material. Payments received or made at the end of the measurement period are recorded as realized gain or loss. Entering into these agreements involves, to varying degrees, elements of credit, market, and documentation risk. Such risks involve the possibility that there will be no liquid market for these agreements, that the counterparty to the agreements may default on its obligation to perform or disagree as to the meaning of contractual terms in the agreements, and that there may be unfavorable changes in interest rates.

When-Issued, Forward Commitments and Delayed Settlements

The Fund may purchase and sell securities on a when-issued, forward commitment or delayed settlement basis. The Fund does not intend to engage in these transactions for speculative purposes but only in furtherance of its investment objectives.

The Fund will purchase securities on a when-issued, forward commitment or delayed settlement basis only with the intention of completing the transaction. If deemed advisable as a matter of investment strategy, however, the Fund may dispose of or renegotiate a commitment after it is entered into, and may sell securities it has committed to purchase before those securities are delivered to the Fund on the settlement date. In these cases, the Fund may realize a taxable capital gain or loss. When the Fund engages in when-issued, forward commitment and delayed settlement transactions, it relies on the other party to consummate the trade. Failure of such party to do so may result in the Fund incurring a loss or missing an opportunity to obtain a price credited to be advantageous.

The market value of the securities underlying a when-issued purchase, forward commitment to purchase securities, or a delayed settlement and any subsequent fluctuations in their market value is taken into account when determining the market value of the Fund starting on the day the Fund agrees to purchase the securities. The Fund does not earn interest on the securities it has committed to purchase until it has paid for and delivered on the settlement date.

Illiquid and Restricted Securities

The Fund may invest up to 15% of its net assets in illiquid securities. Illiquid securities include securities subject to contractual or legal restrictions on resale (e.g., because they have not been registered under the Securities Act of 1933, as amended (the "Securities Act")) and securities that are otherwise not readily marketable (e.g., because trading in the security is suspended or because market makers do not exist or will not entertain bids or offers). Securities that have not been registered under the Securities Act are referred to as private placements or restricted securities and are purchased directly from the issuer or in the secondary market. Foreign securities that are freely tradable in their principal markets are not considered to be illiquid.

Restricted and other illiquid securities may be subject to the potential for delays on resale and uncertainty in valuation. The Fund might be unable to dispose of illiquid securities promptly or at reasonable prices and might thereby experience difficulty in satisfying redemption requests from shareholders. The Fund might have to register restricted securities in order to dispose of them, resulting in additional expense and delay. Adverse market conditions could impede such a public offering of securities.

A large institutional market exists for certain securities that are not registered under the Securities Act, including foreign securities. The fact that there are contractual or legal restrictions on resale to the general public or to certain institutions may not be indicative of the liquidity of such investments. Rule 144A under the Securities Act allows such a broader institutional trading market for securities otherwise subject to restrictions on resale to the general public. Rule 144A establishes a "safe harbor" from the registration requirements of the Securities Act for resale of certain securities to qualified institutional buyers. Rule 144A and the PORTAL Alliance have produced enhanced liquidity for many restricted securities. The PORTAL Alliance is an open industry-wide platform to facilitate over the counter trading of 144A equity securities and is intended to enhance the liquidity and transparency of 144A equity securities by creating a source for indicative quotes, trade reporting and issuer information for 144A equity securities.

Under guidelines adopted by the Trust's Board, the Adviser or any sub-adviser may determine that particular Rule 144A securities, and commercial paper issued in reliance on the private placement exemption from registration afforded by Section 4(a)(2) of the Securities Act, are liquid even though they are not registered. A determination of whether such a security is liquid or not is a question of fact. In making this determination, the Adviser or any sub-adviser will consider, as it deems appropriate under the circumstances and among other factors: (1) the frequency of trades and quotes for the security; (2) the number of dealers willing to purchase or sell the security; (3) the number of other potential purchasers of the security; (4) dealer undertakings to make a market in the security; (5) the nature of the security (e.g., debt or equity, date of maturity, terms of dividend or interest payments, and other material terms) and the nature of the marketplace trades (e.g., the time needed to dispose of the security, the method of soliciting offers, and the mechanics of transfer); and (6) the rating of the security and the financial condition and prospects of the issuer. In the case of commercial paper, the Adviser or any sub-adviser will also determine that the paper (1) is not traded flat or in default as to principal and interest, and (2) is rated in one of the two highest rating categories by at least two National Statistical Rating Organizations ("NRSROs") or, if only one NRSRO rates the security, by that NRSRO, or, if the security is unrated, the Adviser or a sub-adviser determines that it is of equivalent quality.

Rule 144A securities and Section 4(a)(2) commercial paper that have been deemed liquid as described above will continue to be monitored by the Adviser or any sub-adviser to determine if the security is no longer liquid as the result of changed conditions. Investing in Rule 144A securities or Section 4(a)(2) commercial paper could have the effect of increasing the amount of the Fund's assets invested in illiquid securities if institutional buyers are unwilling to purchase such securities.

Lending Portfolio Securities

For the purpose of achieving income, the Fund may lend its portfolio securities, provided (1) the loan is secured continuously by collateral consisting of U.S. Government securities or cash or cash equivalents (cash, U.S. Government securities, negotiable certificates of deposit, bankers' acceptances or letters of credit) maintained on a daily mark-to-market basis in an amount at least equal to the current market value of the securities loaned, (2) the Fund may at any time call the loan and obtain the return of securities loaned, (3) the Fund will receive any interest or dividends received on the loaned securities, and (4) the aggregate value of the securities loaned will not at any time exceed one-third of the total assets of the Fund.

Short Sales

The Fund may sell securities short as an outright investment strategy and to offset potential declines in long positions in similar securities. A short sale is a transaction in which the Fund sells a security it does not own or have the right to acquire (or that it owns but does not wish to deliver) in anticipation that the market price of that security will decline.

When the Fund makes a short sale, the broker-dealer through which the short sale is made must borrow the security sold short and deliver it to the party purchasing the security. The Fund is required to make a margin deposit in connection with such short sales; the Fund may have to pay a fee to borrow particular securities and will often be obligated to pay over any dividends and accrued interest on borrowed securities.

If the price of the security sold short increases between the time of the short sale and the time the Fund covers its short position, the Fund will incur a loss; conversely, if the price declines, the Fund will realize a capital gain. Any gain will be decreased, and any loss increased, by the transaction costs described above. The successful use of short selling may be adversely affected by imperfect correlation between movements in the price of the security sold short and the securities being hedged.

Wholly-Owned Subsidiary

The Fund may invest up to 25% of its total assets in a wholly-owned and controlled Cayman Islands subsidiary (the "Subsidiary"), which, if utilized, would be expected to invest primarily in commodity and option contracts and other financial markets globally, as well as fixed income securities and other investments intended to serve as margin or collateral for the Subsidiary's derivatives positions. As a result, the Fund may be considered to be investing indirectly in these investments through the Subsidiary, if utilized. For that reason, and for the sake of convenience, references in this Statement of Additional Information to the Fund may also include the Subsidiary.

The Subsidiary, if utilized, will not be registered under the 1940 Act but would be subject to certain of the investor protections of that Act, as noted in this Statement of Additional Information. The Fund, as the sole shareholder of the Subsidiary, would not have all of the protections offered to investors in registered investment companies. However, since the Fund would wholly own and control its Subsidiary, and the Fund and Subsidiary would both be managed by the Adviser, it is unlikely that the Subsidiary would take action contrary to the interests of the Fund or its shareholders. The Board has oversight responsibility for the investment activities of the Fund, including any investment in a Subsidiary and the Fund's role as the sole shareholder of a Subsidiary. Also, in managing the Subsidiary's portfolio, the Adviser would be subject to the same investment restrictions and operational guidelines that apply to the management of the Fund.

Changes in the laws of the United States and/or the Cayman Islands, under which the Fund and a Subsidiary, respectively, are organized, could result in the inability of the Fund and/or its Subsidiary to operate as described in this Statement of Additional Information and could negatively affect the Fund and its shareholders. For example, the Cayman Islands does not currently impose any income, corporate or capital gains tax, estate duty, inheritance tax, gift tax or withholding tax on the Subsidiary. If Cayman Islands law changes such that a Subsidiary must pay Cayman Islands taxes, and the Fund at that time was utilizing a Subsidiary, then the Fund's shareholders would likely suffer decreased investment returns.

Risk of Potential Government Regulation of Derivatives

It is possible that additional government regulation of various types of derivative instruments, including futures and swap agreements, may limit or prevent the Fund from using such instruments as part of its investment strategy, and could ultimately prevent the Fund from being able to achieve its investment goals. The regulation of swaps and futures transactions in the U.S. is a rapidly changing area of the law and is subject to modification by government and judicial action. In particular, the Dodd-Frank Wall Street Reform and Consumer Protection Act (the "Dodd-Frank Act ") (which was passed into law in July 2010), and related regulatory developments, has resulted in new regulation of swap agreements, including margin, clearing, reporting, recordkeeping and registration requirements for certain types of swap contracts and other derivatives, including amount other interest rate swaps and credit default swaps. Because these requirements are new and evolving, and certain of the rules are not yet final, its ultimate impact remains unclear. New regulations could, among other things, limit or completely restrict the ability of the Fund to use these instruments as a part of its investment strategy, increase the costs of using these instruments or make them less effective. New rules under the Dodd-Frank Act require certain over-the-counter derivatives, including certain interest rate swaps and certain credit default swaps, to be executed on a regulated market and cleared through a central counterparty, which may result in increased margin requirements and costs for the Fund. Furthermore, limits or restrictions applicable to the counterparties with which the Fund engages in derivative transactions could also prevent the Fund from using these instruments or affect the pricing or other factors relating to these instruments, or may change availability of certain investments.

Specific Risks Relating to Managed Futures and Derivatives Trading

Futures and Derivatives Trading Is Speculative. Futures and derivatives, including commodity interest, prices are highly volatile. Price movements for futures contracts, for example, which may fluctuate substantially during a short period of time, are influenced by numerous factors that affect the commodities markets, including, but not limited to: changing supply and demand relationships; government programs and policies; national and international political and economic events and changes in interest rates.

Futures and Derivatives Trading Is Highly Leveraged. The low margin deposits normally required in trading futures and derivatives permit an extremely high degree of leverage. Accordingly, a relatively small price movement in a commodity interest may result in an immediate and substantial loss to the investor. For example, if at the time of purchase 5% of the price of a futures contract is deposited as margin, a 5% decrease in the price of the futures contract would, if the contract were then closed out, result in a total loss of the margin deposit (brokerage commission expense would also be incurred). Like other leveraged investments, any futures and derivatives trade may result in losses in excess of the amount invested.

Futures and Derivatives Trading May Be Illiquid. Most U.S. commodity futures exchanges impose daily limits regulating the maximum amount above or below the previous day's settlement price which a futures contract price may fluctuate during a single day. During a single trading day no trades may be executed at prices beyond the daily limit. Once the price of a particular futures contract has increased or decreased to the limit point, it may be difficult, costly or impossible to liquidate a position. Futures prices in particular contracts have occasionally moved the daily limit for several consecutive days with little or no trading. If this occurs, the Fund might be prevented from promptly liquidating unfavorable positions which could result in substantial losses. Those losses could significantly exceed the margin initially committed to the trades involved. In addition, even if prices have not moved the daily limit, or if there are no limits for the contracts traded by the Fund, the Fund may not be able to execute trades at favorable prices if little trading in the contracts is taking place. It is also possible that an exchange or the CFTC may suspend trading in a particular contract, order immediate settlement of a contract or order that trading to the liquidation of open positions only.

Trading Decisions Based on Technical Analysis. The Fund's portfolio managers use trading programs that use "technical" factors in identifying price moves. The success of technical analysis depends upon the occurrence in the future of price movements. Technical systems will not be profitable and may in fact produce losses if there are no market moves of the kind the system seeks to follow. Any factor that would make it more difficult to execute the trades identified, such as a reduction of liquidity, also would reduce profitability. There is no assurance that any trading system will generate profits under all or any market conditions.

Reliance on Key Personnel. The Adviser and Sub-Adviser may depend on the services of one or two key persons. If they cannot or will not provide those services, it could adversely affect their ability to trade.

Possible Effects of Speculative Position Limits and Accountability Levels. The CFTC and U.S. exchanges have established speculative position limits and accountability levels. Position limits control the number of net long or net short speculative futures or option (on futures) positions any person may hold or control in futures or option contracts traded on U.S. exchanges. Position accountability levels are position levels established by an exchange that, if reached by a person, cause such person to be subject to instructions by such exchange to reduce or not increase such position. The Adviser and/or Sub-Adviser will control the commodity trading of other accounts. All positions and accounts owned or controlled the Adviser and/or Sub-Adviser their principals are combined for position limit and accountability level purposes. In order to comply with position limits or exchange limitations arising out of having positions subject to accountability levels, it is possible that positions held for the Fund will have to be liquidated. That could have a negative effect on the Fund's profitability.

Changes in the Number of Available Futures Contracts and Related Options. U.S. and foreign exchanges have established new futures and options contracts in the past few years. This trend could continue. The Fund's portfolio managers might not be successful trading those new contracts.

Other Clients of the Adviser and Sub-Adviser. The Adviser and Sub-Adviser manage other accounts. There is no assurance that the Fund's trading will generate the same results as any other accounts managed by the Adviser and Sub-Adviser.

Failure of Clearing Brokers, Counterparties, Banks, Custodians and other Financial Firms. Commodity brokers must maintain the Fund's assets (other than assets used to trade foreign futures or options on foreign markets) in a segregated account. If a commodity broker goes bankrupt, the Fund could lose money as it may only be able to recover a pro rata share of the property available for distribution to all of the broker's customers.

Trading on Foreign Exchanges and Currency Exchange Rate Fluctuations. Trading may occur on foreign exchanges and other non-U.S. markets. Neither existing CFTC regulations nor regulations of any other U.S. governmental agency apply to transactions on foreign markets. The Fund is at risk for fluctuations in the exchange rate between the currencies in which it trades and U.S. dollars. It also is possible that exchange controls could be imposed in the future. There is no restriction on how much of the Fund's trading might be on foreign markets.

Trading in Over the Counter Instruments. The trading of over-the-counter instruments, subjects the Fund to a variety of risks including: (1) counterparty risk; (2) basis risk; (3) interest rate risk; (4) settlement risk; (5) legal risk; and (6) operational risk. Counterparty risk is the risk that the Fund's counterparties might default on their obligation to pay or perform generally on their obligations. The over-the-counter markets and some foreign markets are "principals' markets." That means that performance of the contract is the responsibility only of the individual firm or member on

the other side of the trade and not any exchange or clearing corporation. Such "counterparty risk" is accentuated for contracts with longer maturities where events may intervene to prevent settlement, or where the Fund may have concentrated its transactions with a single or small group of counterparties. Basis risk is the risk attributable to the movements in the spread between the derivative contract price and the future price of the underlying instrument. Interest rate risk is the general risk associated with movements in interest rates. Settlement risk is the risk that a settlement in a transfer system does not take place as expected. Legal risk is the risk that a transaction proves unenforceable in law or because it has been inadequately documented. Operational risk is the risk of unexpected losses arising from deficiencies in a firm's management information, support and control systems and procedures. Transactions in over-the-counter derivatives may involve other risks as well, as there is no exchange market on which to close out an open position. It may be impossible to liquidate an existing position, to assess the value of a position or to assess the exposure to risk.

Exchange for Physicals. The Fund may exchange a cash, forward or spot market position outside of regular trading hours for a comparable futures position. Such transactions are subject to counterparty creditworthiness risk. The CFTC has permitted the futures exchanges to expand the types of over-the-counter positions that can be part of an exchange for physicals position.

Rule 18f-4 Compliance. Rule 18f-4 under the 1940 Act regulates the use of derivatives transactions as defined by that rule for certain funds registered under the 1940 Act ("Rule 18f-4"). Due to the way derivatives transactions are defined by Rule 18f-4, it includes transactions traditionally characterized as derivatives as well as certain transactions that have not been traditionally characterized as derivatives. Unless a Fund qualifies as a "limited derivatives user" as defined in Rule 18f-4, the rule, among other things, requires the Fund to establish a derivatives risk management program, comply with certain value-at-risk ("VAR") based leverage limits, appoint a derivatives risk manager and provide additional disclosure both publicly and to the SEC regarding its derivatives positions.

For the purposes of compliance with Rule 18f-4, the Fund has established a derivatives risk management program and has appointed a derivatives risk manager.

Commodity Pool Operator Regulation

The Fund is, and any related Subsidiary would be, a "commodity pool" under the CEA, and the Adviser is a "commodity pool operator" registered with and regulated by the Commodity Futures Trading Commission ("CFTC") and is a member of the National Futures Association ("NFA"). As a registered commodity pool operator with respect to the Fund and any Subsidiary, the Adviser must comply with various regulatory requirements under the CEA, and the rules and regulations of the CFTC and the NFA, including investor protection requirements, antifraud prohibitions, disclosure requirements, and reporting and recordkeeping requirements. The Adviser is also subject to periodic inspections and audits by the CFTC and NFA.

INVESTMENT RESTRICTIONS

The Fund has adopted the following investment restrictions that may not be changed without approval by a "majority of the outstanding shares" of the Fund which, as used in this SAI, means the vote of the lesser of (a) 67% or more of the shares of the Fund represented at a meeting, if the holders of more than 50% of the outstanding shares of the Fund are present or represented by proxy, or (b) more than 50% of the outstanding shares of the Fund. The Fund may not:

1. Issue senior securities. This limitation is not applicable to activities that may be deemed to involve the issuance or sale of a senior security by the Fund, provided that the Fund's engagement in such activities is consistent with or permitted by the 1940 Act, as amended, the rules and regulations promulgated thereunder or interpretations of the SEC or its staff;

2. Borrow money, except (a) from a bank, provided that immediately after such borrowing there is an asset coverage of 300% for all borrowings of the Fund; or (b) from a bank or other persons for temporary purposes only, provided that such temporary borrowings are in an amount not exceeding 5% of the Fund's total assets at the time when the borrowing is made. This limitation does not preclude the Fund from entering into reverse repurchase transactions, provided that the Fund has an asset coverage of 300% for all borrowings and repurchase commitments of the Fund pursuant to reverse repurchase transactions;

3. Purchase securities on margin, participate on a joint or joint and several basis in any securities trading account, or underwrite securities. (Does not preclude the Fund from obtaining such short-term repurchase credit as may be necessary for the clearance of purchases and sales of its portfolio securities, and except to the extent that the Fund may be deemed an underwriter under the Securities Act, by virtue of disposing of portfolio securities);

4. Purchase or sell real estate or interests in real estate. This limitation is not applicable to investments in marketable securities that are secured by or represent interests in real estate. This limitation does not preclude the Fund from investing in mortgage-related securities or investing in companies engaged in the real estate business or that have a significant portion of their assets in real estate (including real estate investment trusts);

5. Invest 25% or more of the market value of its assets in the securities of companies engaged in any one industry or group of industries. (Does not apply to investment in the securities of the U.S. Government, its agencies or instrumentalities.). The Fund takes the position that mortgage-backed securities and asset-backed securities, whether government-issued or privately issued do not represent interests in any particular "industry" or group of industries, and therefore the 25% concentration restrictions noted above do not apply to such securities.

6. Purchase or sell commodities (unless acquired as a result of ownership of securities or other investments) or commodity futures contracts, except that the Fund may purchase and sell futures contracts and options to the full extent permitted under the 1940 Act, sell foreign currency contracts in accordance with any rules of the CFTC, invest in securities or other instruments backed by commodities, and invest in companies that are engaged in a commodities business or have a significant portion of their assets in commodities; or

7. Make loans to others, except (a) through the purchase of debt securities in accordance with its investment objectives and policies, (b) to the extent the entry into a repurchase agreement is deemed to be a loan, and (c) by loaning portfolio securities.

8. Act as underwriter of securities issued by other persons. This limitation is not applicable to the extent that, in connection with the disposition of portfolio securities (including restricted securities), the Fund may be deemed an underwriter under certain federal securities laws.

The Fund observes the following policies, which are not deemed fundamental and which may be changed without shareholder vote. The Fund may not:

1. Invest in any issuer for purposes of exercising control or management;
2. Invest in securities of other investment companies except as permitted under the 1940 Act;

3. Invest, in the aggregate, more than 15% of its net assets in securities with legal or contractual restrictions on resale, securities, which are not readily marketable and repurchase agreements with more than seven days to maturity. However, if more than 15% of Fund assets (defined as net assets plus the amount of any borrowing for investment purposes) are illiquid, the Fund's investment adviser(s) will reduce illiquid assets such that they do not represent more than 15% of Fund assets, subject to timing and other considerations which are in the best interests of the Fund and its shareholders; or

4. Mortgage, pledge, hypothecate or in any manner transfer, as security for indebtedness, any assets of the Fund except as may be necessary in connection with borrowings described in limitation (2) above describing the fundamental restrictions. Margin deposits, security interests, liens and collateral arrangements with respect to transactions involving options, futures contracts, short sales and other permitted investments and techniques are not deemed to be a mortgage, pledge or hypothecation of assets for purposes of this limitation. Such margin deposits, security interest, liens and collateral arrangements plus any Fund assets mortgaged, pledged, hypothecated or transferred may not exceed 33 1/3% of the Fund's total assets.

If a restriction on the Fund's investments is adhered to at the time an investment is made, a subsequent change in the percentage of Fund assets invested in certain securities or other instruments, or change in average duration of the Fund's investment portfolio, resulting from changes in the value of the Fund's total assets, will not be considered a violation of the restriction; provided, however, that the asset coverage requirement applicable to borrowings shall be maintained in the manner contemplated by applicable law.

A Subsidiary, if utilized, will also follow the Fund's fundamental and non-fundamental investment restrictions, described above, with respect to its investments. The Fund will look through any Subsidiary for purposes of compliance with diversification, leverage, liquidity and concentration requirements and restrictions.

POLICIES AND PROCEDURES FOR DISCLOSURE OF PORTFOLIO HOLDINGS

The Trust has adopted policies and procedures that govern the disclosure of the Fund's portfolio holdings. These policies and procedures are designed to ensure that such disclosure is in the best interests of Fund's shareholders.

It is the Trust's policy to: (1) ensure that any disclosure of portfolio holdings information is in the best interest of Trust shareholders; (2) protect the confidentiality of portfolio holdings information; (3) have procedures in place to guard against personal trading based on the information; and (4) ensure that the disclosure of portfolio holdings

information does not create conflicts between the interests of the Trust's shareholders and those of the Trust's affiliates. The Trust's Chief Compliance Officer monitors any potential conflicts of interest and seeks to mitigate through careful review of such disclosures and requests to add approved recipients.

The Fund discloses its portfolio holdings by mailing the annual and semi-annual reports to shareholders approximately two months after the end of the fiscal year and semi-annual period. In addition, the Fund discloses its portfolio holdings reports on Forms N-CSR and Form N-PORT two months after the end of each quarter/semi-annual period. The Trust's Chief Compliance Officer is responsible for monitoring disclosures of Fund holdings.

The Fund may choose to make portfolio holdings information available to rating agencies such as Lipper, Morningstar or Bloomberg earlier and more frequently on a confidential basis.

Under limited circumstances, as described below, the Fund's portfolio holdings may be disclosed to, or known by, certain third parties in advance of their filing with the Securities and Exchange Commission on Form N-CSR or Form N-PORT. In each case, a determination has been made that such advance disclosure is supported by a legitimate business purpose and that the recipient and its personnel is subject to a duty to keep the information confidential and to not trade on any material non-public information.

The Adviser and Sub-Adviser. Personnel of the Adviser and the Sub-Adviser, including personnel responsible for managing the Fund's portfolio, may have full daily access to the Fund's portfolio holdings because that information is necessary in order for the Adviser and Sub-Adviser to provide their management, administrative, and investment services to the Fund. As required for purposes of analyzing the impact of existing and future market changes on the prices, availability, demand and liquidity of such securities, as well as for the assistance of portfolio managers in the trading of such securities, personnel of the Adviser and Sub-Adviser may also release and discuss certain portfolio holdings with various broker-dealers.

Ultimus Fund Solutions, LLC. Ultimus Fund Solutions, LLC is the transfer agent, fund accountant, administrator and custody administrator for the Fund; therefore, its personnel have full daily access to the Fund's portfolio holdings because that information is necessary in order for them to provide the agreed-upon services for the Trust.

U.S. Bank, National Association. U.S. Bank, National Association is custodian for the Fund; therefore, its personnel have full daily access to the Fund's portfolio holdings because that information is necessary in order for them to provide the agreed-upon services for the Trust.

Deloitte & Touche LLP. Deloitte & Touche LLP is the Fund's independent registered public accounting firm; therefore, its personnel have access to the Fund's portfolio holdings in connection with auditing of the Fund's annual consolidated financial statements and providing assistance and consultation in connection with SEC filings.

Thompson Hine LLP. Thompson Hine LLP is counsel to the Fund; therefore, its personnel have access to the Fund's portfolio holdings in connection with review of the Fund's annual and semi-annual shareholder reports and SEC filings.

Counsel to the Independent Trustees. Counsel to the Independent Trustees and its personnel have access to the Fund's portfolio holdings in connection with review of the Fund's annual and semi-annual shareholder reports and SEC filings.

NAV Consulting, Inc. NAV Consulting, Inc. provides account reconciliation services to the Adviser; therefore, its personnel have full daily access to the portfolio holdings of the Fund, because that information is necessary in order for NAV Consulting, Inc. to provide the agreed-upon services.

Additions to List of Approved Recipients

The Trust's Chief Compliance Officer is the person responsible, and whose prior approval is required, for any disclosure of the Fund's portfolio securities at any time or to any persons other than those described above. In such cases, the recipient must have a legitimate business need for the information and must be subject to a duty to keep the information confidential and to not trade on any material non-public information. There are no ongoing arrangements in place with respect to the disclosure of portfolio holdings. In no event shall the Fund, the Adviser or any sub-adviser, or any other party receive any direct or indirect compensation in connection with the disclosure of information about the Fund's portfolio holdings.

Compliance with Portfolio Holdings Disclosure Procedures

The Trust's Chief Compliance Officer will report periodically to the Board with respect to compliance with the Fund's portfolio holdings disclosure procedures, and from time to time will provide the Board any updates to the portfolio holdings disclosure policies and procedures.

There is no assurance that the Trust's policies on disclosure of portfolio holdings will protect the Fund from the potential misuse of holdings information by individuals or firms in possession of that information.

MANAGEMENT

The business of the Trust is managed under the direction of the Board in accordance with the Agreement and Declaration of Trust and the Trust's By-laws (the "Governing Documents"), which have been filed with the Securities and Exchange Commission and are available upon request. The Board consists of six (6) individuals (as defined under the 1940 Act) of the Trust, or any investment adviser to any series of the Trust ("Independent Trustees"). Pursuant to the Governing Documents of the Trust, the Trustees shall elect officers including a President, a Secretary, a Treasurer, a Principal Executive Officer and a Principal Accounting Officer. The Board retains the power to conduct, operate and carry on the business of the Trust and has the power to incur and pay any expenses, which, in the opinion of the Board, are necessary or incidental to carry out any of the Trust's purposes. The Trustees, officers, employees and agents of the Trust, when acting in such capacities, shall not be subject to any personal liability except for his or her own bad faith, willful misfeasance, gross negligence or reckless disregard of his or her duties.

Board Leadership Structure

The Trust is led by Anthony Hertl, an Independent Trustee, who has served as the Chairman of the Board since July 2013. The Board of Trustees is comprised of Mr. Hertl and five (5) additional Independent Trustees. Additionally, under certain 1940 Act governance guidelines that apply to the Trust, the Independent Trustees will meet in executive session, at least quarterly. Under the Trust's Agreement and Declaration of Trust and By-Laws, the Chairman of the Board is responsible for (a) presiding at Board meetings, (b) calling special meetings on an as-needed basis, (c) execution and administration of Trust policies including (i) setting the agendas for Board meetings and (ii) providing information to Board members in advance of each Board meeting and between Board meetings. Generally, the Trust believes it best to have a non-executive Chairman of the Board, who together with the President (principal executive officer), are seen by its shareholders, business partners and other stakeholders as providing strong leadership. The Trust

believes that its Chairman, the independent chair of the Audit Committee, and, as an entity, the full Board of Trustees, provide effective leadership that is in the best interests of the Trust, its Funds and each shareholder.

Board Risk Oversight

The Board of Trustees has a standing independent Audit Committee with a separate chair, Mark H. Taylor. The Board is responsible for overseeing risk management, and the full Board regularly engages in discussions of risk management and receives compliance reports that inform its oversight of risk management from its Chief Compliance Officer at quarterly meetings and on an ad hoc basis, when and if necessary. The Audit Committee considers financial and reporting risk within its area of responsibilities. Generally, the Board believes that its oversight of material risks is adequately maintained through the compliance-reporting chain where the Chief Compliance Officer is the primary recipient and communicator of such risk-related information.

Trustee Qualifications

Generally, the Trust believes that each Trustee is competent to serve because of their individual overall merits including: (i) experience, (ii) qualifications, (iii) attributes and (iv) skills.

Anthony J. Hertl has over 20 years of business experience in the financial services industry and related fields including serving as chair of the finance committee for the Borough of Interlaken, New Jersey and Vice President-Finance and Administration of Marymount College, holds a Certified Public Accountant designation, serves or has served as a member of other mutual fund boards outside of the group of Funds managed by the Adviser (the "Fund Complex") and possesses a strong understanding of the regulatory framework under which investment companies must operate based on his years of service to this Board and other fund boards.

Gary W. Lanzen has over 20 years of business experience in the financial services industry, holds a Master's degree in Education Administration, is a Certified Financial Planner, serves as a member of two other mutual fund boards outside of the Fund Complex and possesses a strong understanding of the regulatory framework under which investment companies must operate based on his years of service to this Board and other mutual fund boards.

Mark H. Taylor holds PhD, Masters and Bachelors degrees in Accountancy, is a licensed Certified Public Accountant and has over 30 years of academic and professional experience in the accounting and auditing fields, all of which make him particularly qualified to chair the Trust's Audit Committee. Dr. Taylor is the Director of the Lynn Pippenger School of Accountancy at the Muma College of Business at the University of South Florida and is serving a three-year term as President of the American Accounting Association (AAA) commencing August 2022 (President-Elect 2022-2023, President 2023-2024; Past President 2024-2025). Dr. Taylor previously served as AAA Vice President-Finance, and as President of the Auditing Section of the AAA. Dr. Taylor serves as a member of three other mutual fund boards within the Northern Lights Fund Complex. He served a three-year term on the AICPA's Auditing Standards Board (2010-2012) and previously completed a fellowship in the Professional Practice Group of the Office of the Chief Accountant at the headquarters of the United States Securities Exchange Commission. Dr. Taylor is a member of two research teams that have received grants from the Center for Audit Quality to study how accounting firms' tone-at-the top messaging impacts audit performance and how auditors manage the process of auditing fair value measurements and other complex estimates in financial statements. Dr. Taylor has published extensively in leading academic accounting journals, has teaching interests in corporate governance and accounting policy as well as auditing and assurance services at the graduate and undergraduate levels, and possesses a strong understanding of the regulatory framework under which investment companies operate.

John V. Palancia has over 30 years of business experience in financial services industry including serving as the Director of Futures Operations for Merrill Lynch, Pierce, Fenner & Smith, Inc. ("Merrill Lynch"). Mr. Palancia holds a Bachelor of Science degree in Economics. He also possesses a strong understanding of risk management, balance

sheet analysis and the regulatory framework under which regulated financial entities must operate based on service to Merrill Lynch. Additionally, he is well versed in the regulatory framework under which investment companies must operate and serves as a member of three other fund boards.

Mark D. Gersten has more than 30 years of experience in the financial services industry, having served in executive roles at AllianceBernstein LP and holding key industry positions at Prudential-Bache Securities and PriceWaterhouseCoopers. He also serves as a member of two other mutual fund boards outside of the Fund Complex. Mr. Gersten is a certified public accountant and holds an MBA in accounting. Like other Trustees, his experience has given him a strong understanding of the regulatory framework under which investment companies operate.

Mark S. Garbin has more than 30 years of experience in corporate balance sheet and income statement risk management for large asset managers, serving as Managing Principal of Coherent Capital Management LLC since 2007. Mr. Garbin has extensive derivatives experience and has provided consulting services to alternative asset managers. He is both a Chartered Financial Analyst and Professional Risk Manager charterholder and holds advanced degrees in international business. The Trust does not believe any one factor is determinative in assessing a Trustee's qualifications, but that the collective experience of each Trustee makes them each highly qualified.

The Trustees and the executive officers of the Trust are listed below with their present positions with the Trust and principal occupations over at least the last five years. The business address of each Trustee and Officer is 225 Pictoria Drive, Suite 450, Cincinnati, OH 45246. All correspondence to the Trustees and Officers should be directed to c/o Ultimus Fund Solutions, LLC, P.O. Box 541150, Omaha, Nebraska 68154.

N/A	N/A
------------------------------------	--	---	-----	-----

*The term of office for each Trustee and officer listed above will continue indefinitely until the individual resigns or is removed.

**As of February 29, 2024, the Trust was comprised of 64 active portfolios managed by unaffiliated investment advisers. The term "Fund Complex" applies only to the Funds in the Trust advised by the Fund's Adviser. The Funds do not hold themselves out as related to any other series within the Trust that is not advised by the Fund's Adviser.

Board Committees

Audit Committee

The Board has an Audit Committee that consists of all the Trustees who are not "interested persons" of the Trust within the meaning of the 1940 Act. The Audit Committee's responsibilities include: (i) recommending to the Board the selection, retention or termination of the Trust's independent auditors; (ii) reviewing with the independent auditors the scope, performance and anticipated cost of their audit; (iii) discussing with the independent auditors certain matters relating to the Trust's financial statements, including any adjustment to such financial statements recommended by such independent auditors, or any other results of any audit; (iv) reviewing on a periodic basis a formal written statement from the independent auditors with respect to their independence, discussing with the independent auditors any relationships or services disclosed in the statement that may impact the objectivity and independence of the Trust's independent auditors and recommending that the Board take appropriate action in response thereto to satisfy itself of the auditor's independence; and (v) considering the comments of the independent auditors and management's responses thereto with respect to the quality and adequacy of the Trust's accounting and financial reporting policies and practices and internal controls. The Audit Committee operates pursuant to an Audit Committee Charter. The Audit Committee is responsible for seeking and reviewing nominee candidates for consideration as Independent Trustees as is from time to time considered necessary or appropriate. The Audit Committee generally will not consider shareholder nominees. The Audit Committee is also responsible for reviewing and setting Independent Trustee compensation from time to time when considered necessary or appropriate. During the past fiscal year, the Audit Committee held ten meetings.

Compensation

Effective January 1, 2024, each Trustee who is not affiliated with the Trust or an investment adviser to any series of the Trust will receive a quarterly fee of \$50,000, allocated among each of the various portfolios comprising the Trust and Northern Lights Variable Trust (together, the "Trusts"), a separate registrant that shares a common board with the Trust, for his attendance at the regularly scheduled meetings of the Board, to be paid in advance of each calendar quarter, as well as reimbursement for any reasonable expenses incurred. In addition to which, the Chairman of the Board receives a quarterly fee of \$13,750 and the Audit Committee Chairman receives a quarterly fee of \$10,000.

Prior to January 1, 2024, each Trustee who was not affiliated with the Trusts or an investment adviser to any series of the Trusts received a quarterly fee of \$48,750, allocated among each of the various portfolios comprising

the Trusts. In addition to the quarterly fees and reimbursements, the Chairman of the Board previously received a quarterly fee of \$13,750 and the Audit Committee Chairman receives a quarterly fee of \$10,000.

Additionally, in the event a meeting of the Board of Trustees other than its regularly scheduled meetings (a “Special Meeting”) is required, each Independent Trustee will receive a fee of \$2,500 per Special Meeting, as well as reimbursement for any reasonable expenses incurred, to be paid by the relevant series of the applicable Trust or its investment adviser depending on the circumstances necessitating the Special Meeting.

None of the executive officers receive compensation from the Trusts.

The table below details the amount of compensation the Trustees received from the Trust during the fiscal year ended December 31, 2023. Each Independent Trustee attended all quarterly meetings during the period. The Trust does not have a bonus, profit sharing, pension or retirement plan.

Trustee Ownership

The following table indicates the dollar range of equity securities that each Trustee beneficially owned in the Fund as of December 31, 2023.

NAME OF TRUSTEE	DOLLAR RANGE OF EQUITY SECURITIES IN THE FUND	AGGREGATE DOLLAR RANGE OF EQUITY SECURITIES IN ALL REGISTERED INVESTMENT COMPANIES OVERSEEN BY TRUSTEE IN FAMILY OF INVESTMENT COMPANIES
Anthony J. Hertl	None	\$50,001-\$100,000
Gary Lanzen	None	None
Mark H. Taylor	None	None
John V. Palancia	None	None

Mark D. Gersten	None	\$10,001-\$50,000
Mark Garbin	None	\$50,001-\$100,000

Management Ownership

As of April 4, 2024, the Trustees and officers, as a group, owned less than 1.00% of the Fund's outstanding shares and less than 1.00% of the Fund Complex's outstanding shares.

CONTROL PERSONS AND PRINCIPAL HOLDERS

A principal shareholder is any person who owns of record or beneficially 5% or more of the outstanding shares of a fund. A control person is one who owns beneficially or through controlled companies more than 25% of the voting securities of a company or acknowledged the existence of control. Persons controlling the Fund can determine the outcome of any proposal submitted to the shareholders for approval.

As of the date of this SAI, no shareholder owned 5% or more of the outstanding shares of any class of the Fund.

As of April 4, 2024, the following shareholders of record owned 5% or more of a Class of the outstanding shares of each Fund as noted.

Class A Shares	Total Shares	Percentage
Pershing LLC PO Box 2052 Jersey City, NJ 07303	1,651	99.94%

INVESTMENT ADVISER

Investment Adviser and Advisory Agreement

Altegris Advisors, L.L.C. (the "Adviser"), located at 1200 Prospect Street, Suite 400 La Jolla, CA 92037, was established in 2010 and serves as investment adviser to the Fund. Altegris Advisors is a CFTC-registered commodity pool operator, NFA member, and SEC registered investment adviser that sponsors and/or manages alternative investment products. Subject to the oversight of the Board of Trustees, the Adviser is responsible for the overall management of the Fund's business affairs. Pursuant to an investment advisory agreement (the "Advisory Agreement") with the Trust, on behalf of the Fund, the Adviser, subject to the supervision of the Board of the Trust, and in conformity with the stated policies of the Fund, manages the portfolio investment operations of the Fund.

The Adviser has overall supervisory responsibilities for the general management and investment of the Fund's securities portfolio through the Sub-Adviser, as detailed below, which are subject to review and approval by the Board of Trustees. The Adviser delegates elements of management of the Fund's portfolio, including the selection of the Fund's investments, to the Sub-Adviser. The adviser retains responsibility for various aspects of the Fund's management including setting the Fund's overall investment objectives, monitoring and evaluating the performance of the sub-adviser, implementing procedures to ensure the sub-adviser complies with the Fund's investment objectives, policies and restrictions.

The Sub-Adviser for the Fund, in consultation with the Adviser, will identify prospective portfolio investments in line with the Fund's underlying strategies. The Adviser will conduct its own due diligence to ensure the Sub-Adviser is executing the Fund's investment strategies within the established guidelines. The Adviser also retains the ability to override the Sub-Adviser's allocation of assets and its selection of specific investments if it believes an investment or allocation is not consistent with the Fund's investment guidelines. The Adviser is responsible for ongoing performance evaluation and monitoring of the Sub-Adviser.

Under the Advisory Agreement, the Adviser, under the oversight of the Board of Trustees, agrees to invest the assets of the Fund directly in accordance with applicable law and the investment objective, policies and restrictions set forth in the Fund's current Prospectus and Statement of Additional Information, and subject to such further limitations as the Trust may from time to time impose by written notice to the Adviser. The Adviser shall act as the

investment adviser to the Fund and, as such shall, directly, (i) obtain and evaluate such information relating to the economy, industries, business, securities markets and securities as it may deem necessary or useful in discharging its responsibilities here under, (ii) formulate a continuing program for the investment of the assets of the Fund in a manner consistent with its investment objective, policies and restrictions, and (iii) determine from time to time securities to be purchased, sold, retained or lent by the Fund, and implement those decisions, including the selection of entities with or through which such purchases, sales or loans are to be effected; provided, that the Adviser or its designee, directly, will place orders pursuant to its investment determinations either directly with the issuer or with a broker or dealer, and if with a broker or dealer, (a) will attempt to obtain the best price and execution of its orders, and (b) may nevertheless in its discretion purchase and sell portfolio securities from and to brokers who provide the Adviser with research, analysis, advice and similar services and pay such brokers in return a higher commission or spread than may be charged by other brokers. The Adviser also provides the Fund with all necessary office facilities and personnel for servicing the Fund's investments, compensates all officers, Trustees and employees of the Trust who are officers, directors or employees of the Adviser, and all personnel of the Fund or the Adviser performing services relating to research, statistical and investment activities. The Advisory Agreement was approved by the Board, including by a majority of the Independent Trustees, at a meeting held on November 15, 2022.

In addition, the adviser, directly subject to the oversight of the Board of Trustees, provides the management and administrative services necessary for the operation of the Fund. These services include providing facilities for maintaining the Trust's organization; supervising relations with custodians, transfer and pricing agents, accountants, underwriters and other persons dealing with the Fund; preparing all general shareholder communications and conducting shareholder relations; maintaining the Fund's records and the registration of the Fund's shares under federal securities laws and making necessary filings under state securities laws; developing management and shareholder services for the Fund; and furnishing reports, evaluations and analyses on a variety of subjects to the Trustees.

Pursuant to the Advisory Agreement between the Trust, on behalf of the Fund, and the Adviser, the Adviser is entitled to receive, on a monthly basis, an annual advisory fee equal to 1.50% of the Fund's average daily net assets.

The Adviser has contractually agreed to reduce its fees and reimburse expenses of the Fund until at least August 31, 2025, to ensure the total Fund operating expenses after fee waiver and reimbursement (exclusive of any front-end or contingent deferred loads, brokerage fees and commissions, acquired fund fees and expenses, fees and expenses associated with investments in in other collective investment vehicles or derivative instruments (including for example options and swap fees and expenses), borrowing costs (such as interest and dividend expense on securities sold short), taxes, expenses incurred in connection with any merger or reorganization, and extraordinary expenses, such as litigation expenses (which may include indemnification of Fund officers and Trustees and contractual indemnification of Fund service providers (other than the Adviser)) will not exceed certain levels.

Fund Class	Expense Cap	Minimum Duration
Class A	1.99%	August 31, 2025
Class I	1.74%	August 31, 2025

Waived fees and expense reimbursements are subject to possible recoupment from the relevant Fund in future years on a rolling three year basis (within the three years after the fees have been waived or reimbursed) if such recoupment can be achieved within the foregoing expense limits. During the fiscal year ended December 31, 2023, the Fund accrued \$26,774 in advisory fees, of which all were waived.

A discussion regarding the basis for the Board of Trustees' approval of the Advisory Agreement and Sub-Advisory agreements with respect to the Fund is available in the Fund's semi-annual report dated June 30, 2023.

Expenses not expressly assumed by the Adviser under the Advisory Agreement are paid by the Fund. Under the terms of the Advisory Agreement, the Fund is responsible for the payment of the following expenses among others: (a) the fees payable to the Adviser, (b) the fees and expenses of Trustees who are not affiliated persons of the Adviser or Distributor (as defined under the section entitled "The Distributor") (c) the fees and certain expenses of the Custodian (as defined under the section entitled "Custodian") and Transfer and Dividend Disbursing Agent (as defined under the section entitled "Transfer Agent"), including the cost of maintaining certain required records of the Fund and of pricing the Fund's shares, (d) the charges and expenses of legal counsel and independent accountants for the Fund, (e) brokerage commissions and any issue or transfer taxes chargeable to the Fund in connection with its securities transactions, (f) all taxes and corporate fees payable by the Fund to governmental agencies, (g) the fees of any trade association of which the Fund may be a member, (h) the cost of fidelity and liability insurance, (i) the fees and expenses involved in registering and maintaining registration of the Fund and of shares with the SEC, qualifying its shares under state securities laws, including the preparation and printing of the Fund's registration statements and prospectuses for such purposes, (j) all expenses of shareholders and Trustees' meetings (including travel expenses of trustees and officers of the Trust who are directors, officers or employees of the Adviser) and of preparing, printing and mailing reports, proxy statements and prospectuses to shareholders in the amount necessary for distribution to the shareholders and (k) litigation and indemnification expenses and other extraordinary expenses not incurred in the ordinary course of the Fund's business.

The Advisory Agreement and Sub-Advisory Agreement (as defined below) continue in effect for two (2) years initially and thereafter shall continue from year to year provided such continuance is approved at least annually by (a) a vote of the majority of the Independent Trustees, cast in person at a meeting specifically called for the purpose of voting on such approval and by (b) the majority vote of either all of the Trustees or the vote of a majority of the outstanding shares of the Fund. The Advisory Agreement may be terminated without penalty on 60 days written notice by a vote of a majority of the Trustees or by the Adviser, or by holders of a majority of that Trust's outstanding shares. The Advisory Agreement shall terminate automatically in the event of its assignment.

Sub-Adviser and Sub-Advisory Agreements

The Adviser has engaged Crabel Capital Management, LLC, to serve as Sub-Adviser to the Fund. The Sub-Adviser is organized as a Wisconsin limited liability company and its main office is located at 1999 Avenue of the Stars, Suite 2550, Los Angeles, California 90067. The Sub-Adviser is registered as a CTA and CPO with the CFTC and is a member of the NFA. The Sub-Adviser is also registered as an investment adviser with the SEC. The Sub-Adviser is a global alternative investment firm specializing in systematic, automated trading of worldwide futures and currencies.

The Sub-Adviser is responsible for selecting investments and assuring that investments are made according to the Fund's investment objective(s), policies and restrictions.

The Sub-Advisory Agreement provides that the Sub-Adviser will formulate and implement a continuous investment program for the Fund, in accordance with the Fund's objective(s), policies and limitations and any investment guidelines established by the Adviser. The Sub-Adviser will, subject to the supervision and control of the Adviser, determine in its discretion which issuers and securities will be purchased, held, sold or exchanged by the Fund, and will place orders with and give instruction to brokers and dealers to cause the execution of such transactions. The Sub-Adviser is required to furnish, at its own expense, all investment facilities necessary to perform its obligations under the respective Sub-Advisory Agreement. Pursuant to the Sub-Advisory Agreement between the Adviser and Sub-Adviser, the Sub-Adviser is entitled to receive an annual sub-advisory fee as a percentage of the net advisory fee received by the Adviser from the Fund. The Sub-Adviser is paid by the Adviser, not the Fund.

The Sub-Advisory Agreement shall continue in effect for two (2) years initially and then from year to year, provided it is approved at least annually by a vote of the majority of the Trustees, who are not parties to the agreement or interested persons of any such party, cast in person at a meeting specifically called for the purpose of voting on such approval. The Sub-Advisory Agreement may be terminated without penalty at any time by the Adviser or the Sub-Adviser on 60 days written notice, and will automatically terminate in the event of its "assignment" (as that term is defined in the 1940 Act).

Codes of Ethics

The Trust, the Adviser, the Sub-Adviser and the Distributor each have adopted codes of ethics (each a "Code") under Rule 17j-1 under the 1940 Act that governs the personal securities transactions of their board members, officers and employees who may have access to current trading information of the Trust. Under the Code, the Trustees are permitted to invest in securities that may also be purchased by the Fund.

In addition, the Trust has adopted a Code, that applies only to the Trust's executive officers to ensure that these officers promote professional conduct in the practice of corporate governance and management. The purpose behind these guidelines is to promote (i) honest and ethical conduct, including the ethical handling of actual or apparent conflicts of interest between personal and professional relationships; (ii) full, fair, accurate, timely, and understandable disclosure in reports and documents that a registrant files with, or submits to, the SEC and in other public communications made by the Fund; (iii) compliance with applicable governmental laws, rule and regulations; (iv) the prompt internal reporting of violations of this Code to an appropriate person or persons identified in the Code; and (v) accountability for adherence to the Code.

Proxy Voting Policies

The Board has adopted Proxy Voting Policies and Procedures ("Policies") on behalf of the Trust, which delegate the responsibility for voting proxies to the Adviser or its designee, subject to the Board's continuing oversight. The Policies require that the Adviser or its designee vote proxies received in a manner consistent with the best interests of the Fund and its shareholders. The Policies also require the Adviser or its designee to present to the Board, at least

annually, the Adviser's Proxy Policies, or the proxy policies of the Adviser's designee, and a record of each proxy voted by the Adviser or its designee on behalf of the Fund, including a report on the resolution of all proxies identified by the Adviser as involving a conflict of interest. In the event one or more sub-advisers are engaged to trade all or a portion of Fund assets, it is anticipated that each respective sub-adviser will vote all proxies that are received by it on the Fund's behalf.

When a proxy proposal raises a material conflict between the Adviser's or a sub-adviser's interests and the Fund's interests, the Adviser or sub-adviser will resolve the conflict by voting in accordance with the policy guidelines or at the client's directive using the recommendation of an independent third party. If the third party's recommendations are not received in a timely fashion, the Adviser or any sub-adviser will abstain from voting the securities held by that client's account. A copy of the Adviser's proxy voting policies is attached hereto as Appendix A.

More information. Information regarding how the Fund voted proxies relating to portfolio securities held by the Fund during the most recent 12-month period ended June 30 will be available (1) without charge, upon request, by calling the Fund at 1-877-772-5838; and (2) on the U.S. Securities and Exchange Commission's website at <http://www.sec.gov>. In addition, a copy of the Fund's proxy voting policies and procedures are also available by calling 1-877-772-5838 and will be sent within three business days of receipt of a request.

THE DISTRIBUTOR

Northern Lights Distributors, LLC, located at 4221 North 203rd Street, Suite 100, Elkhorn, NE 68022 (the "Distributor") serves as the principal underwriter and national distributor for the shares of the Trust pursuant to an underwriting agreement with the Trust (the "Underwriting Agreement"). The Distributor is registered as a broker-dealer under the Securities Exchange Act of 1934 and each state's securities laws and is a member of the Financial Industry Regulatory Authority, Inc. ("FINRA"). The offering of the Fund's shares is continuous. The Underwriting Agreement provides that the Distributor, as agent in connection with the distribution of the Fund's shares, will use reasonable efforts to facilitate the sale of the Fund's shares.

The Underwriting Agreement provides that, unless sooner terminated, it will continue in effect for two years initially and thereafter shall continue from year to year, subject to annual approval by (a) the Board or a vote of a majority of the outstanding shares, and (b) by a majority of the Trustees who are not interested persons of the Trust or of the Distributor by vote cast in person at a meeting called for the purpose of voting on such approval.

The Underwriting Agreement may be terminated by the Fund at any time, without the payment of any penalty, by vote of a majority of the entire Board of the Trust or by vote of a majority of the outstanding shares of the Fund on 60 days written notice to the Distributor, or by the Distributor at any time, without the payment of any penalty, on 60 days written notice to the Fund. The Underwriting Agreement will automatically terminate in the event of its assignment.

The Distributor may enter into selling agreements with broker-dealers that solicit orders for the sale of shares of the Fund and may allow concessions to dealers that sell shares of the Fund. The Distributor receives the portion of the sales charge on all direct initial investments in a Fund and on all investments in accounts with no designated dealer of record. The Distributor also receives 12b-1 fees from the Fund as described under the following section entitled "Rule 12b-1 Plan".

The following table sets forth the total compensation received by the Distributor from the Fund during the fiscal year ended December 31, 2023:

FUND	NET UNDERWRITING DISCOUNTS AND COMMISSIONS	COMPENSATION ON REDEMPTIONS AND REPURCHASES	BROKERAGE COMMISSIONS	OTHER COMPENSATION
Altegris Crabel Multi-Strategy Fund	\$0	\$0	\$0	\$0

* The Distributor also received 12b-1 fees from the Fund as described under the following section entitled "Rule 12b-1 Plans".

Rule 12b-1 Plans

The Trust has adopted a Master Distribution and Shareholder Servicing Plan pursuant to Rule 12b-1 under the 1940 Act for of the Fund's Class A shares (the "Plan") pursuant to which the Fund pays fees to the Distributor for providing distribution and/or shareholder services to the Fund. Under the Plan, Class A shares of the Fund may pay an account maintenance fee for account maintenance services and/or distribution fee at an annual rate of 0.25% of the Fund's average net assets attributable to the relevant class as compensation for the Distributor providing account maintenance and distribution services to shareholders. Such fees are to be paid by the Fund monthly, or at such other intervals, as the Board shall determine. Such fees shall be based upon each share class's average daily net assets during the preceding month and shall be calculated and accrued daily. The Fund may pay fees to the Distributor at a lesser rate, as agreed upon by the Board of the Trust and the Distributor. The Plan authorizes payments to the Distributor as compensation for providing account maintenance services to the Fund's shareholders, including arranging for certain securities dealers or brokers, administrators and others ("Recipients") to provide these services and paying compensation for these services.

The services to be provided by Recipients may include, but are not limited to, the following: assistance in the offering and sale of the Fund's Class A shares and in other aspects of the marketing of the shares to clients or prospective clients of the respective recipients; answering routine inquiries concerning the Fund; assisting in the establishment and maintenance of accounts or sub-accounts in the Fund and in processing purchase and redemption transactions; making the Fund's investment plan and shareholder services available; and providing such other information and services to investors in shares of the Fund as the Distributor or the Trust, on behalf of the Fund, may reasonably request. The distribution services shall also include any advertising and marketing services provided by or arranged by the Distributor with respect to the Fund. The Adviser may be compensated by the Distributor for its distribution and marketing efforts.

The Distributor is required to provide a written report, at least quarterly to the Board of the Trust, specifying in reasonable detail the amounts expended pursuant to the Rule 12b-1 Plan and the purposes for which such expenditures were made. Further, the Distributor will inform the Board of any Rule 12b-1 fees to be paid by the Distributor to Recipients.

The initial term of the Plan is one year and will continue in effect from year to year thereafter, provided such continuance is specifically approved at least annually by a majority of the Board of the Trust and a majority of the Trustees who are not "interested persons" of the Trust and do not have a direct or indirect financial interest in a Rule 12b-1 Plan ("Rule 12b-1 Trustees") by votes cast in person at a meeting called for the purpose of voting on the Plan. The Plans may be terminated at any time by the Trust or the Fund by vote of a majority of the Rule 12b-1 Trustees or by vote of a majority of the outstanding voting shares of the Fund.

The Plans may not be amended to increase materially the amount of the Distributor's compensation to be paid by the Fund, unless such amendment is approved by the vote of a majority of the outstanding voting securities of the affected class of the Fund (as defined in the 1940 Act). All material amendments must be approved by a majority of the Board of the Trust and a majority of the Rule 12b-1 Trustees by votes cast in person at a meeting called for the purpose of voting on a Plan. During the term of a Plan, the selection and nomination of non-interested Trustees of the Trust will be committed to the discretion of current non-interested Trustees. The Distributor will preserve copies of the Plan, any related agreements, and all reports, for a period of not less than six years from the date of such document and for at least the first two years in an easily accessible place.

Any agreement related to a Plan will be in writing and provide that: (a) it may be terminated by the Trust or the applicable Fund at any time upon sixty days' written notice, without the payment of any penalty, by vote of a majority of the respective Rule 12b-1 Trustees, or by vote of a majority of the outstanding voting securities of the Trust or Fund; (b) it will automatically terminate in the event of its assignment (as defined in the 1940 Act); and (c) it will continue in effect for a period of more than one year from the date of its execution or adoption only so long as such continuance is specifically approved at least annually by a majority of the Board and a majority of the Rule 12b-1 Trustees by votes cast in person at a meeting called for the purpose of voting on such agreement.

Additional Compensation to Financial Intermediaries

The Distributor, its affiliates, and the Adviser and their affiliates may each, at their own expense and out of their own expense and out of their own assets including their legitimate profits from Fund-related activities, provide additional cash payments to financial intermediaries who sell shares of the Fund. Financial intermediaries include brokers, financial planners, banks, insurance companies, retirement or 401(k) plan administrators and others. These payments may be in addition to the Rule 12b-1 fees and any sales charges that are disclosed elsewhere in this prospectus. These payments are generally made to financial intermediaries that provide shareholder or administrative services, or marketing support. Marketing support may include access to sales meetings, sales representatives and financial intermediary management representatives, inclusion of the Fund on a sales list, including a preferred or select sales list, or other sales programs. These payments also may be made as an expense reimbursement in cases where the financial intermediary provides shareholder services to Fund shareholders. The Distributor may, from time to time, provide promotional incentives to certain investment firms. Such incentives may, at the Distributor's discretion, be limited to investment firms who allow their individual selling representatives to participate in such additional compensation.

PORTFOLIO MANAGERS

Matthew Osborne, Michael Pomada and Grant Jaffarian, serve as Co-Portfolio Managers of the Fund. As of December 31, 2023 they were responsible for the portfolio management of the following types of accounts in addition to the Fund:

MATTHEW OSBORNE	Total Number of Accounts by Account Type	Total Assets By Account Type (in millions)	Number of Accounts by Type Subject to a Performance Fee	Total Assets By Account Type Subject to a Performance Fee (in millions)
Other Accounts By Type				
Registered Investment Companies	1	\$54.6	0	\$0
Other Pooled Investment Vehicles	0	\$0	0	\$0
Other Accounts	0	\$0	0	\$0

MICHAEL POMADA Other Accounts By Type	Total Number of Accounts by Account Type	Total Assets By Account Type (in millions)	Number of Accounts by Type Subject to a Performance Fee	Total Assets By Account Type Subject to a Performance Fee (in millions)
Registered Investment Companies	5	\$363.31	0	\$0
Other Pooled Investment Vehicles	15	\$1,495.56	6	\$1,043
Other Accounts	29	\$3,189.76	14	\$1,874

GRANT JAFFARIAN Other Accounts By Type	Total Number of Accounts by Account Type	Total Assets By Account Type (in millions)	Number of Accounts by Type Subject to a Performance Fee	Total Assets By Account Type Subject to a Performance Fee (in millions)
Registered Investment Companies	5	\$363.31	0	\$0
Other Pooled Investment Vehicles	5	\$371.77	0	\$0
Other Accounts	13	\$991.94	2	\$63

Conflicts of Interest

When a Portfolio Manager has responsibility for managing more than one account, potential conflicts of interest may arise. Those conflicts could include preferential treatment of one account over others in terms of allocation of resources or of investment opportunities. For instance, the Adviser or Sub-Adviser may receive fees from certain accounts that are higher than the fee it receives from the Fund, or it may receive a performance-based fee on certain accounts. The procedures to address conflicts of interest are described below with respect to each Portfolio Manager.

The Adviser will attempt to avoid conflicts of interest that may arise as a result of the management of multiple client accounts. From time to time, the Adviser may recommend or cause a client to invest in a security in which another client of the Adviser has an ownership position. The Adviser has adopted certain procedures intended to treat all client accounts in a fair and equitable manner. To the extent that the Adviser seeks to purchase or sell the same security for multiple client accounts, the Adviser may aggregate, or bunch, these orders where it deems this to be appropriate and consistent with applicable regulatory requirements. When a bunched order is filled in its entirety, each participating client account will participate at the average share prices for the bunched order. When a bunched order is only partially filled, the securities purchased will be allocated on a pro-rata basis to each account participating in the bunched order based upon the initial amount requested for the account, subject to certain exceptions. Each participating account will receive the average share price for the bunched order on the same business day.

The Sub-Adviser, will be reviewed annually by the Adviser for potential conflicts of interest. The Adviser is aware that the Sub-Adviser may receive fees from certain other accounts it manages that are higher than the fee it receives from the Fund or it may receive a performance-based fee on certain accounts. In addition, the Sub-Adviser may manage accounts with similar objectives and strategies as the Fund. The Sub-Adviser may receive more compensation with respect to accounts with similar objectives and strategies than that which it received with respect to the Fund or it may receive compensation based in part on the performance of the accounts with similar objectives and strategies. To the extent that the Sub-Adviser seeks to purchase or sell the same security for multiple client accounts, the Sub-Adviser may aggregate, or bunch, these orders where it deems this to be appropriate and consistent with applicable regulatory requirements. Additionally, the Sub-Adviser and any of its directors, partners, officers, agents or employees may buy, sell, or trade securities for their own accounts or the proprietary accounts of the Sub-Adviser. The Adviser will regularly monitor the Sub-Adviser for these potential conflicts.

Compensation

Matthew Osborne, in addition to being a Co-Portfolio Manager to the Fund, is a partial equity owner of the Adviser's parent company and a senior executive of the Adviser. As such, he is compensated primarily through ownership distributions from the Adviser's parent company and may receive additional compensation dependent on the future profitability of the Adviser and its affiliates.

Crabel portfolio managers are compensated with a competitive salary and have the opportunity for a discretionary bonus. An employee's individual performance and the performance of the firm are factors considered when determining the bonus amount. Certain senior executives participate as profits interest owners of the firm. Portfolio manager compensation related to individual strategy performance is variable and generally determined based on a percentage of the fees earned from the aggregate assets of each strategy. Managers are not compensated if they meet or exceed an index or other performance target or based on the performance of a strategy. Each strategy is designed to achieve a specific volatility target, which an investor expects to achieve. Due to the systematic nature of Crabel's trading, managers do not have sole discretion to modify strategy parameters or to enter discretionary trades as a way to influence performance of the strategy. In any year that the firm receives performance-based fees, a portfolio manager, along with all other firm employees, may receive higher total compensation based on the firm's overall probability in such year. Compensation is reviewed periodically to ensure all employee compensation is competitive and reflects the role of the individual employee including responsibility, job complexity, performance, and job market conditions.

Ownership of Securities.

The following table shows the dollar range of equity securities beneficially owned by the Portfolio Managers for the Fund as of December 31, 2023:

Name of Portfolio Manger	Dollar Range of Equity Securities in the Fund
Matthew Osborne	over \$100, 000
Michael Pomada	None
Grant Jaffarian	None

ORGANIZATION AND MANAGEMENT OF WHOLLY-OWNED SUBSIDIARY

The Fund may invest up to 25% of its total assets in its Subsidiary. It is expected that the Subsidiary will invest primarily in commodities. The Subsidiary is a company organized under the laws of the Cayman Islands, whose registered office is located at the office of Walkers Corporate Limited, 190 Elgin Avenue, George Town, Grand Cayman KY1-9008. The Subsidiary's affairs are overseen by a board of directors consisting of the following directors:

Name and Year of Birth	Position/Term of Office	Principal Occupation During the Past Five Years
Kevin E. Wolf Born in 1969	President Since June 2017	Executive Vice President, Head of Fund Administration, and Product; Ultimus Fund Solutions, LLC (since 2020); Vice President of The Ultimus Group, LLC (since 2019); Executive Vice President, Gemini Fund Services, LLC (2019-2020); President, Gemini Fund Services, LLC (2012-2019); Treasurer of the Trust (2006-June 2017).

The Subsidiary has entered into a separate contract with the Adviser for the management of the Subsidiary's portfolio. The Subsidiary has also entered into arrangements with U.S. Bank, National Association to serve as the Subsidiary's custodian, and with Ultimus Fund Solutions, LLC to serve as the Subsidiary's transfer agent. The Subsidiary has adopted compliance policies and procedures that are substantially similar to the policies and procedures adopted by the Fund. The Trust's Chief Compliance Officer oversees implementation of each Subsidiary's policies and procedures, and makes periodic reports to the Fund's Board regarding the Subsidiary's compliance with its policies and procedures.

The Fund pays the Adviser a fee for its services. The Adviser has contractually agreed to waive the management fee it receives from the Fund in an amount equal to the management fee paid to the Adviser by the applicable Subsidiary. This undertaking will continue in effect for so long as the Fund invests in its Subsidiary, and may not be terminated by the Adviser unless the Adviser first obtains the prior approval of the Board of Trustees for such termination. The Subsidiary will bear the fees and expenses incurred in connection with the custody, transfer agency, and audit services that it receives. The Fund expects that the expenses borne by its Subsidiary will not be material in relation to the value of the Fund's assets. It is also anticipated that the Fund's own expense will be reduced to some extent as a result of the payment of such expenses at the Subsidiary level. It is therefore expected that the Fund's investment in its Subsidiary will not result in the Fund's paying duplicative fees for similar services provided to the Fund and Subsidiary.

Please refer to the section in this Statement of Additional Information titled "Tax Status – Wholly Owned Subsidiary" for information about certain tax aspects of any Fund investment in a Subsidiary.

ALLOCATION OF PORTFOLIO BROKERAGE

Specific decisions to purchase or sell securities for the Fund are made by the Co-Portfolio Managers who are employees of the Adviser and Sub-Adviser. The Adviser and Sub-Adviser are authorized by the Trustees to allocate the orders placed by them on behalf of the Fund to brokers or dealers who may, but need not, provide research or statistical material or other services to the Fund or the Adviser or Sub-Adviser for the Fund's use. Such allocation is to be in such amounts and proportions as the Adviser or Sub-Adviser may determine.

In selecting a broker or dealer to execute each particular transaction, the Adviser and Sub-Adviser will take the following into consideration:

- The best net price available;
- The reliability, integrity and financial condition of the broker or dealer;
- The size of and difficulty in executing the order; and
- The value of the expected contribution of the broker or dealer to the investment performance of the Fund on a continuing basis.

Brokers or dealers executing a portfolio transaction on behalf of the Fund may receive a commission in excess of the amount of commission another broker or dealer would have charged for executing the transaction if the Adviser or Sub-Adviser determines in good faith that such commission is reasonable in relation to the value of brokerage and research services provided to the Fund. In allocating portfolio brokerage, the Adviser or Sub-Adviser may select brokers or dealers who also provide brokerage, research and other services to other accounts over which the Adviser or Sub-Adviser exercises investment discretion. Some of the services received as the result of the Fund's transactions may primarily benefit accounts other than the Fund, while services received as the result of portfolio transactions effected on behalf of those other accounts may primarily benefit the Fund. For the fiscal year ended December 31, 2023, the Fund paid brokerage commissions of \$3,319.

PORTFOLIO TURNOVER

The Fund's portfolio turnover rate is calculated by dividing the lesser of purchases or sales of portfolio securities for the fiscal year by the monthly average of the value of the portfolio securities owned by the Fund during the fiscal year. The calculation excludes from both the numerator and the denominator securities with maturities at the time of acquisition of one year or less. High portfolio turnover involves correspondingly greater brokerage commissions and other transaction costs, which will be borne directly by the Fund. A 100% turnover rate would occur if all of the Fund's portfolio securities were replaced once within a one-year period. For the fiscal year ended December 31, 2023, the Fund had a portfolio turnover rate was 0%.

OTHER SERVICE PROVIDERS

Fund Administration, Fund Accounting and Transfer Agent Services

Ultimus Fund Solutions, LLC, ("UFS"), which has its principal office at 80 Arkay Drive, Suite 110, Hauppauge, New York 11788, serves as administrator, fund accountant and transfer agent for the Fund pursuant to the Fund Services Agreement (the "Agreement") with the Trust and subject to the supervision of the Board. UFS is primarily in the business of providing administrative, fund accounting and transfer agent services to retail and institutional mutual funds. UFS is an affiliate of the Distributor. UFS may also provide persons to serve as officers of the Fund. Such officers may be directors, officers or employees of UFS or its affiliates.

Effective February 1, 2019, NorthStar Financial Services Group, LLC, the parent company of Gemini Fund Services, LLC and its affiliated companies including Northern Lights Distributors, LLC and Northern Lights Compliance Services, LLC ("NLCS")(collectively, the "Gemini Companies"), sold its interest in the Gemini Companies to a third party private equity firm that contemporaneously acquired Ultimus Fund Solutions, LLC (an independent mutual fund administration firm) and its affiliates (collectively, the "Ultimus Companies"). As a result of these separate transactions, the Gemini Companies and the Ultimus Companies are now indirectly owned through a common parent entity, The Ultimus Group, LLC.

The Agreement became effective on June 22, 2011 and remained in effect for two years from the applicable effective date for the Fund, and will continue in effect for successive twelve-month periods provided that such continuance is specifically approved at least annually by a majority of the Board. The Agreement is terminable by the Board or UFS on 90 days' written notice and may be assigned by either party, provided that the Trust may not assign this agreement without the prior written consent of UFS. The Agreement provides that UFS shall be without liability for any action reasonably taken or omitted pursuant to the Agreement.

Under the Agreement, UFS performs administrative services, including: (1) monitoring the performance of administrative and professional services rendered to the Trust by others service providers; (2) monitoring the Fund's holdings and operations for post-trade compliance with the Fund's registration statement and applicable laws and rules; (3) preparing and coordinating the printing of semi-annual and annual financial statements; (4) preparing selected management reports for performance and compliance analyses; (5) preparing and disseminating materials for and attending and participating in meetings of the Board; (6) determining income and capital gains available for distribution and calculating distributions required to meet regulatory, income, and excise tax requirements; (7) reviewing the Trust's federal, state, and local tax returns as prepared and signed by the Trust's independent public accountants; (8) preparing and maintaining the Trust's operating expense budget to determine proper expense accruals to be charged to the Fund to calculate its daily net asset value; (9) assisting in and monitoring the preparation, filing, printing and where applicable, dissemination to shareholders of amendments to the Trust's Registration Statement on Form N-1A, periodic reports to the Trustees, shareholders and the SEC, notices pursuant to Rule 24f-2, proxy materials and reports to the SEC on Forms N-CEN, N-CSR, N-PORT and N-PX; (10) coordinating the Trust's audits and examinations by assisting the

Fund's independent public accountants; (11) determining, in consultation with others, the jurisdictions in which shares of the Trust shall be registered or qualified for sale and facilitating such registration or qualification; (12) monitoring sales of shares and ensure that the shares are properly and duly registered with the SEC; (13) monitoring the calculation of performance data for the Fund; (14) preparing, or cause to be prepared, expense and financial reports; (15) preparing authorizations for the payment of Trust expenses and pay, from Trust assets, all bills of the Trust; (16) providing information typically supplied in the investment company industry to companies that track or report price, performance or other information with respect to investment companies; (17) upon request, assisting the Fund in the evaluation and selection of other service providers, such as independent public accountants, printers, EDGAR providers and proxy solicitors (such parties may be affiliates of UFS) and (18) performing other services, recordkeeping and assistance relating to the affairs of the Trust as the Trust may, from time to time, reasonably request. For the administrative services rendered to the Fund by UFS, the Fund pays the greater of an annual minimum fee or an asset based fee, which scales downward based upon net assets. The Fund also pays UFS for any out-of-pocket expenses. During the fiscal year ended December 31, 2023, the Fund paid \$19,973 for administrative fees.

UFS also provides the Fund with accounting services, including: (i) daily computation of net asset value; (ii) maintenance of security ledgers and books and records as required by the 1940 Act; (iii) production of the Fund's listing of portfolio securities and general ledger reports; (iv) reconciliation of accounting records; (v) calculation of yield and total return for the Fund; (vi) maintenance of certain books and records described in Rule 31a-1 under the 1940 Act, and reconciliation of account information and balances among the Fund's custodian and Adviser; and (vii) monitoring and evaluation of daily income and expense accruals, and sales and redemptions of shares of the Fund. For the fund accounting services rendered to the Fund by the Agreement, the Fund pays UFS, the greater of an annual minimum fee or an asset based fee, which scales downward based upon net assets. The Fund also pays UFS for any out-of-pocket expenses. During the fiscal period ended December 31, 2023, the Fund paid \$17,834 for fund accounting fees.

UFS also acts as transfer, dividend disbursing, and shareholder servicing agent for the Fund pursuant to the Agreement. Under the Agreement, UFS is responsible for administering and performing transfer agent functions, dividend distribution, shareholder administration, and maintaining necessary records in accordance with applicable rules and regulations. For such services rendered to the Fund under the Agreement, the Fund pays UFS the greater of an annual minimum fee or an asset based fee, which scales downward based upon net assets. During the fiscal year ended December 31, 2023, the Fund paid \$32,583 for transfer agent fees.

Custodian

The Fund's assets are held for safekeeping by an independent custodian, U.S. Bank, N.A., 425 Walnut Street, Cincinnati, Ohio 45202 (the "Custodian"), pursuant to a custody agreement by and between the Custodian and the Trust on behalf of the Fund. The Custodian's responsibilities on behalf of the Fund include safeguarding and controlling the Fund's cash and securities, handling the receipt and delivery of cash and securities, collecting interest and dividends on the Fund's investments, and maintaining records of purchases and sales.

Compliance Services

Northern Lights Compliance Services, LLC, 4221 North 203rd Street, Suite 100, Elkhorn, NE 68022, an affiliate of UFS and the Distributor, provides a Chief Compliance Officer to the Trust as well as related compliance services pursuant to a consulting agreement between NLCS and the Trust. NLCS's compliance services consist primarily of reviewing and assessing the policies and procedures of the Trust and its service providers pertaining to compliance with applicable federal securities laws, including Rule 38a-1 under the 1940 Act. For the compliance services rendered to the Fund, the Fund pays NLCS an annual fixed fee and an asset-based fee, which scales downward based upon the Fund's net assets. The Fund also pay NLCS for any out-of-pocket expenses. For the fiscal year ended December 31, 2023, the Fund paid \$11,953 in compliance service fees.

DESCRIPTION OF SHARES

Each share of beneficial interest of the Trust has one vote in the election of Trustees. Cumulative voting is not authorized for the Trust. This means that the holders of more than 50% of the shares voting for the election of Trustees can elect 100% of the Trustees if they choose to do so, and, in that event, the holders of the remaining shares will be unable to elect any Trustees.

Shareholders of the Trust and any other future series of the Trust will vote in the aggregate and not by series except as otherwise required by law or when the Board determines that the matter to be voted upon affects only the interest of the shareholders of a particular series or classes. Matters such as election of Trustees are not subject to separate voting requirements and may be acted upon by shareholders of the Trust voting without regard to series.

The Trust is authorized to issue an unlimited number of shares of beneficial interest. Each share has equal dividend, distribution and liquidation rights. There are no conversion or preemptive rights applicable to any shares of the Fund. All shares issued are fully paid and non-assessable.

ANTI-MONEY LAUNDERING PROGRAM

The Trust has established an Anti-Money Laundering Compliance Program (the "Program") as required by the Uniting and Strengthening America by Providing Appropriate Tools Required to Intercept and Obstruct Terrorism Act of 2001 ("USA PATRIOT Act"). To ensure compliance with this law, the Trust's Program provides for the development of internal practices, procedures and controls, designation of anti-money laundering compliance officers, an ongoing training program and an independent audit function to determine the effectiveness of the Program. The Trust's secretary serves as its Anti-Money Laundering Compliance Officer.

Procedures to implement the Program include, but are not limited to, determining that the Fund's Distributor and Transfer Agent have established proper anti-money laundering procedures, reporting suspicious and/or fraudulent activity and a providing a complete and thorough review of all new opening account applications. The Trust will not transact business with any person or entity whose identity cannot be adequately verified under the provisions of the USA PATRIOT Act.

As a result of the Program, the Trust may be required to "freeze" the account of a shareholder if the shareholder appears to be involved in suspicious activity or if certain account information matches information on government lists of known terrorists or other suspicious persons, or the Trust may be required to transfer the account or proceeds of the account to a governmental agency.

PURCHASE, REDEMPTION AND PRICING OF SHARES

Calculation of Share Price

As indicated in the Prospectus under the heading "Net Asset Value," the net asset value ("NAV") of the Fund's shares is determined by dividing the total value of the Fund's portfolio investments and other assets, less any liabilities, by the total number of shares outstanding of the Fund.

Generally, the Fund's domestic securities (including underlying ETFs which hold portfolio securities primarily listed on foreign (non-U.S.) exchanges) are valued each day at the last quoted sales price on each security's primary exchange. Securities traded or dealt in upon one or more securities exchanges for which market quotations are readily available and not subject to restrictions against resale shall be valued at the last quoted sales price on the primary

exchange or, in the absence of a sale on the primary exchange, at the mean between the current bid and ask prices on such exchange. Securities primarily traded in the National Association of Securities Dealers' Automated Quotation System ("NASDAQ") National Market System for which market quotations are readily available shall be valued using the NASDAQ Official Closing Price. If market quotations are not readily available, securities will be valued at their fair market value as determined in good faith by the Adviser and/or Sub-Adviser in accordance with procedures approved by the Board and as further described below. Securities that are not traded or dealt in any securities exchange (whether domestic or foreign) and for which over-the-counter market quotations are readily available generally shall be valued at the last sale price or, in the absence of a sale, at the mean between the current bid and ask price on such over-the-counter market.

Certain securities or investments for which daily market quotes are not readily available may be valued, pursuant to guidelines established by the Board, with reference to other securities or indices. Debt securities not traded on an exchange may be valued at prices supplied by a pricing agent(s) based on broker or dealer supplied valuations or matrix pricing, a method of valuing securities by reference to the value of other securities with similar characteristics, such as rating, interest rate and maturity. Short-term investments having a maturity of 60 days or less may be generally valued at amortized cost when it approximated fair value.

Exchange traded options are valued at the last quoted sales price or, in the absence of a sale, at the mean between the current bid and ask prices on the exchange on which such options are traded. Futures and options on futures are valued at the settlement price determined by the exchange. Other securities for which market quotes are not readily available are valued at fair value as determined in good faith by the Board or persons acting at their direction. Swap agreements and other derivatives are generally valued daily based upon quotations from market makers or by a pricing service in accordance with the valuation procedures approved by the Board.

Under certain circumstances, the Fund may use an independent pricing service to calculate the fair market value of foreign equity securities on a daily basis by applying valuation factors to the last sale price or the mean price as noted above. The fair market values supplied by the independent pricing service will generally reflect market trading that occurs after the close of the applicable foreign markets of comparable securities or the value of other instruments that have a strong correlation to the fair-valued securities. The independent pricing service will also take into account the current relevant currency exchange rate. A security that is fair valued may be valued at a price higher or lower than actual market quotations or the value determined by other funds using their own fair valuation procedures. Because foreign securities may trade on days when Fund shares are not priced, the value of securities held by the Fund can change on days when Fund shares cannot be redeemed or purchased. In the event that a foreign security's market quotations are not readily available or are deemed unreliable (for reasons other than because the foreign exchange on which it trades closed before the Fund's calculation of NAV), the security will be valued at its fair market value as determined in good faith by the Adviser and/or Sub-Adviser in accordance with procedures approved by the Board as discussed below. Without fair valuation, it is possible that short-term traders could take advantage of the arbitrage opportunity and dilute the NAV of long-term investors. Fair valuation of the Fund's portfolio securities can serve to reduce arbitrage opportunities available to short-term traders, but there is no assurance that it will prevent dilution of the Fund's NAV by short-term traders. In addition, because the Fund may invest in underlying ETFs which hold portfolio securities primarily listed on foreign (non-U.S.) exchanges, and these exchanges may trade on weekends or other days when the underlying ETFs do not price their shares, the value of these portfolio securities may change on days when you may not be able to buy or sell Fund shares.

Investments initially valued in currencies other than the U.S. dollar are converted to U.S. dollars using exchange rates obtained from pricing services. As a result, the NAV of the Fund's shares may be affected by changes in the value of currencies in relation to the U.S. dollar. The value of securities traded in markets outside the United States or denominated in currencies other than the U.S. dollar may be affected significantly on a day that the New York Stock Exchange is closed and an investor is not able to purchase, redeem or exchange shares.

The Fund's shares are valued at the close of regular trading on the NYSE (normally 4:00 p.m., Eastern Time) (the "NYSE Close") on each day that the NYSE is open. Information that becomes known to the Fund or its agents after the NAV has been calculated on a particular day will not generally be used to retroactively adjust the price of the security or the NAV determined earlier that day. Domestic fixed income and foreign fixed income securities are normally priced using data reflecting the earlier closing of the principal markets for those securities.

The Fund may hold securities, such as private placements, interests in commodity pools, other non-traded securities or temporarily illiquid securities, for which market quotations are not readily available or are determined to be unreliable. These securities will be valued at their fair market value as determined using the "fair value" procedures approved by the Board. The Board has delegated the Adviser as its "Valuation Designee" to execute these procedures. The Adviser may also enlist third party consultants such as an audit firm or financial officer of a security issuer on an as-needed basis to assist in determining a security-specific fair value. The Board reviews the execution of this process and the resultant fair value prices at least quarterly to assure the process produces reliable results.

Valuation Process. The fair value determinations are required for the following securities: (i) securities for which market quotations are insufficient or not readily available on a particular business day (including securities for which there is a short and temporary lapse in the provision of a price by the regular pricing source), (ii) securities for which, in the judgment of the Adviser or any sub-adviser, the prices or values available do not represent the fair value of the instrument. Factors which may cause the Adviser or any sub-adviser to make such a judgment include, but are not limited to, the following: only a bid price or an asked price is available; the spread between bid and asked prices is substantial; the frequency of sales; the thinness of the market; the size of reported trades; and actions of the securities markets, such as the suspension or limitation of trading; (iii) securities determined to be illiquid; (iv) securities with respect to which an event that will affect the value thereof has occurred (a "significant event") since the closing prices were established on the principal exchange on which they are traded, but prior to the Fund's calculation of its net asset value. Specifically, interests in commodity pools or managed futures pools are valued on a daily basis by reference to the closing market prices of each futures contract or other asset held by a pool, as adjusted for pool expenses. Restricted or illiquid securities, such as private placements or non-traded securities are valued via inputs from the Adviser or any sub-adviser valuation based upon the current bid for the security from two or more independent dealers or other parties reasonably familiar with the facts and circumstances of the security (who should take into consideration all relevant factors as may be appropriate under the circumstances). If the Adviser or any sub-adviser is unable to obtain a current bid from such independent dealers or other independent parties, the fair value team shall determine the fair value of such security using the following factors: (i) the type of security; (ii) the cost at date of purchase; (iii) the size and nature of the Fund's holdings; (iv) the discount from market value of unrestricted securities of the same class at the time of purchase and subsequent thereto; (v) information as to any transactions or offers with respect to the security; (vi) the nature and duration of restrictions on disposition of the security and the existence of any registration rights; (vii) how the yield of the security compares to similar securities of companies of similar or equal creditworthiness; (viii) the level of recent trades of similar or comparable securities; (ix) the liquidity characteristics of the security; (x) current market conditions; and (xi) the market value of any securities into which the security is convertible or exchangeable.

Standards For Fair Value Determinations. As a general principle, the fair value of a security is the amount that the Fund might reasonably expect to realize upon its current sale. The Trust has adopted Financial Accounting Standards Board Statement of Financial Accounting Standards Codification Topic 820, Fair Value Measurements and Disclosures ("ASC 820"). In accordance with ASC 820, fair value is defined as the price that the Fund would receive upon selling an investment in a timely transaction to an independent buyer in the principal or most advantageous market of the investment. ASC 820 establishes a three-tier hierarchy to maximize the use of observable market data and minimize the use of unobservable inputs and to establish classification of fair value measurements for disclosure purposes. Inputs refer broadly to the assumptions that market participants would use in pricing the asset or liability, including assumptions about risk, for example, the risk inherent in a particular valuation technique used to measure fair value including such a pricing model and/or the risk inherent in the inputs to the valuation technique. Inputs may

be observable or unobservable. Observable inputs are inputs that reflect the assumptions market participants would use in pricing the asset or liability developed based on market data obtained from sources independent of the reporting entity. Unobservable inputs are inputs that reflect the reporting entity's own assumptions about the assumptions market participants would use in pricing the asset or liability developed based on the best information available in the circumstances.

Various inputs are used in determining the value of the Fund's investments relating to ASC 820. These inputs are summarized in the three broad levels listed below.

Level 1 – quoted prices in active markets for identical securities.

Level 2 – other significant observable inputs (including quoted prices for similar securities, interest rates, prepayment speeds, credit risk, etc.)

Level 3 – significant unobservable inputs (including the Fund's own assumptions in determining the fair value of investments).

The Adviser takes into account the relevant factors and surrounding circumstances, which may include: (i) the nature and pricing history (if any) of the security; (ii) whether any dealer quotations for the security are available; (iii) possible valuation methodologies that could be used to determine the fair value of the security; (iv) the recommendation of a portfolio manager of the Fund with respect to the valuation of the security; (v) whether the same or similar securities are held by other funds managed by the Adviser (or any sub-adviser) or other funds and the method used to price the security in those funds; (vi) the extent to which the fair value to be determined for the security will result from the use of data or formulae produced by independent third parties and (vii) the liquidity or illiquidity of the market for the security.

Board of Trustees Determination

The Board of Trustees meets at least quarterly to consider the valuations provided by the Adviser and to ratify the valuations made for the applicable securities. The Board of Trustees considers the reports provided by the Adviser, including follow up studies of subsequent market-provided prices when available, in reviewing and determining in good faith the fair value of the applicable portfolio securities.

The Trust expects that the holidays upon which the NYSE will be closed are as follows: New Year's Day, Martin Luther King, Jr. Day, Presidents' Day, Good Friday, Memorial Day, Juneteenth Day, Independence Day, Labor Day, Thanksgiving Day, and Christmas Day.

Purchase of Shares

Orders for shares received by the Fund in good order prior to the close of business on the NYSE on each day during such periods that the NYSE is open for trading are priced at the public offering price, which is NAV plus any sales charge, or at net asset value per share (if no sales charges apply) computed as of the close of the regular session of trading on the NYSE. Orders received in good order after the close of the NYSE, or on a day it is not open for trading, are priced at the close of such NYSE on the next day on which it is open for trading at the next determined net asset value per share plus sales charges, if any.

Notice to Texas Shareholders

Under section 72.1021(a) of the Texas Property Code, initial investors in the Fund who are Texas residents may designate a representative to receive notices of abandoned property in connection with Fund shares. Texas

shareholders who wish to appoint a representative should notify the Trust's Transfer Agent by writing to the address below to obtain a form for providing written notice to the Trust:

Altegris Crabel Multi Strategy Fund
c/o Ultimus Fund Solutions, LLC
4221 North 203rd Street, Suite 100
Elkhorn, Nebraska 68022-3474

Redemption of Shares

The Fund will redeem all or any portion of a shareholder's shares of the Fund when requested in accordance with the procedures set forth in the "How to Redeem Shares" section of the Prospectus. Under the 1940 Act, a shareholder's right to redeem shares and to receive payment therefore may be suspended at times:

- (a) when the NYSE is closed, other than customary weekend and holiday closings;
- (b) when trading on that exchange is restricted for any reason;
- (c) when an emergency exists as a result of which disposal by the Fund of securities owned is not reasonably practicable or it is not reasonably practicable for the Fund to fairly to determine the value of net assets, provided that applicable rules and regulations of the SEC (or any succeeding governmental authority) will govern as to whether the conditions prescribed in (b) or (c) exist; or
- (d) when the SEC, by order permits a suspension of the right to redemption or a postponement of the date of payment on redemption.

In case of suspension of the right of redemption, payment of a redemption request will be made based on the net asset value next determined after the termination of the suspension.

Supporting documents in addition to those listed under "How to Redeem Shares" in the Prospectus will be required from executors, administrators, trustees, or if redemption is requested by someone other than the shareholder of record. Such documents include, but are not restricted to, stock powers, trust instruments, certificates of death, appointments as executor, and certificates of corporate authority and waiver of tax required in some states when settling estates.

Contingent Deferred Sales Charge – Class A Shares

A contingent deferred sales charge ("CDSC") of up to 1% may be applied to Class A shares redeemed within 18 months of purchase. The CDSC will equal the amount of the commissions paid on those shares redeemed.

TAX STATUS

The following discussion is general in nature and should not be regarded as an exhaustive presentation of all possible tax ramifications. All shareholders should consult a qualified tax adviser regarding their investment in the Fund.

The Fund intends to continue to qualify as regulated investment company under Subchapter M of the Internal Revenue Code of 1986, as amended (the "Code"), which requires compliance with certain requirements concerning the sources of its income, diversification of its assets, and the amount and timing of its distributions to shareholders. Such qualification does not involve supervision of management or investment practices or policies by any government agency or bureau. By so qualifying, the Fund should not be subject to federal income or excise tax on its investment company taxable income or net capital gain, which are distributed to shareholders in accordance with the applicable timing requirements. Investment company taxable income and net capital gain of the Fund will be computed in accordance with Section 852 of the Code.

Investment company taxable income generally includes dividends and interest and other income, less certain allowable expenses, and it also includes any excess of net short-term capital gains over net long-term capital losses. Net capital gain (that is, any excess of net long-term capital gains over net short-term losses for a fiscal year) is computed by taking into account any capital loss carryforward of the Fund. Capital losses incurred in tax years beginning after December 22, 2010 may now be carried forward indefinitely and retain the character of the original loss. Under previously enacted laws, capital losses could be carried forward to offset any capital gains for only eight years, and carried forward as short-term capital losses, irrespective of the character of the original loss. Capital loss carryforwards are available to offset future realized capital gains. To the extent that these carryforwards are used to offset future capital gains it is probable that the amount offset will not be distributed to shareholders.

The Fund intends to distribute all of its net investment company taxable income and net capital gain in accordance with the timing requirements imposed by the Code and therefore should not be required to pay any federal income or excise taxes. Distributions of investment company taxable income and net capital gain will be made after the end of each fiscal year, and no later than December 31 of each year. Both types of distributions will be in shares of the Fund unless a shareholder elects to receive cash. The Fund's net realized capital gains from securities transactions will be distributed only after reducing the gains by the amount of any available capital loss carry forwards.

To be treated as a regulated investment company under Subchapter M of the Code, the Fund must also (a) derive at least 90% of its gross income from dividends, interest, payments with respect to securities loans, net income from certain publicly traded partnerships and gains from the sale or other disposition of securities or foreign currencies, or other income (including, but not limited to, gains from options, futures or forward contracts) derived with respect to the business of investing in such securities or currencies, and (b) diversify its holdings so that, at the end of each fiscal quarter, (i) at least 50% of the market value of the Fund's assets is represented by cash, U.S. government securities and securities of other regulated investment companies, and other securities (for purposes of this calculation, generally limited in respect of any one issuer, to an amount not greater than 5% of the market value of the Fund's assets and 10% of the outstanding voting securities of such issuer) and (ii) not more than 25% of the value of its assets is invested in the securities of (other than U.S. government securities or the securities of other regulated investment companies) any one issuer, two or more issuers which the Fund controls and which are determined to be engaged in the same or similar trades or businesses, or the securities of certain publicly traded partnerships.

If the Fund fails to qualify as a regulated investment company under Subchapter M in any fiscal year, it will be treated as a corporation for federal income tax purposes. As such, the Fund would be required to pay income taxes on its income at the rates generally applicable to corporations and distributions to shareholders would be treated as taxable dividends to the extent of current or accumulated earnings and profits of the Fund.

Altegris is aware of certain private letter rulings from the Internal Revenue Service issued to other mutual funds, which indicate that income from the fund's investment in a subsidiary will constitute "qualifying income" for purposes of Subchapter M; however, the Fund has not itself received or applied for private letter ruling from the Internal Revenue Service and does not intend to apply for such a ruling. Private letter rulings are not precedent and the Internal Revenue Service is not bound by them. Therefore, if the Internal Revenue Service challenges the position taken by the Fund that the income is qualifying income, it may not prevail and would lose its status as a registered investment company.

The Fund is subject to a 4% nondeductible excise tax on certain undistributed amounts of ordinary income and capital gain under a prescribed formula contained in Section 4982 of the Code. The formula requires payment to shareholders during a calendar year of distributions representing at least 98% of the Fund's ordinary income for the calendar year and at least 98.2% of its capital gain net income (i.e., the excess of its capital gains over capital losses) realized during the one-year period ending October 31 during such year plus 100% of any income that was neither

distributed nor taxed to the Fund during the preceding calendar year. Under ordinary circumstances, the Fund expects to time its distributions so as to avoid liability for this tax.

The following discussion of tax consequences is for the general information of shareholders that are subject to tax. Shareholders that are IRAs or other qualified retirement plans generally are exempt from income taxation under the Code but should consult their own tax advisors about the tax consequences of investing in the Fund, including potential taxation of unrelated business taxable income.

Distributions of taxable net investment income and the excess of net short-term capital gain over net long-term capital loss are taxable to shareholders as ordinary income.

Distributions of investment company taxable income are generally taxable to shareholders as ordinary income or "qualified dividend income" (as described below).

Dividends paid by the Fund to an individual shareholder, to the extent such dividends are attributable to "qualified dividend income" received by the Fund from U.S. corporations (and certain foreign corporations), may qualify for taxation at the long-term capital gains rate available to individuals on qualified dividend income. Furthermore, dividends paid by the Fund to a corporate shareholder, to the extent such dividends are attributable to dividends received by the Fund from U.S. corporations, may qualify for a dividends received deduction.

Distributions of net capital gain ("capital gain dividends") generally are taxable to shareholders as long-term capital gain, regardless of the length of time the shares of the Fund have been held by such shareholders.

An additional 3.8% Medicare tax will be imposed on certain net investment income (including ordinary dividends, qualified dividend income distributions and capital gain dividends, as well as gains from redemption of the Fund's shares) of U.S. individuals, estates and trusts, to the extent that the shareholder's "modified adjusted gross income" (in the case of an individual) or "adjusted gross income" (in the case of an estate or trust) exceeds certain threshold amounts. U.S. shareholders are urged to consult their own tax advisers regarding the implications of the additional Medicare tax resulting from an investment in the Fund.

A redemption of the Fund's shares by a shareholder will result in the recognition of taxable gain or loss in an amount equal to the difference between the amount realized and the shareholder's tax basis in his or her Fund's shares. Such gain or loss is treated as a capital gain or loss if the shares are held as capital assets. However, any loss realized upon the redemption of shares within six months from the date of their purchase will be treated as a long-term capital loss to the extent of any amounts treated as capital gain dividends during such six-month period. All or a portion of any loss realized upon the redemption of shares may be disallowed to the extent shares are purchased (including shares acquired by means of reinvested dividends) within 30 days before or after such redemption.

Distributions of investment company taxable income and net capital gain will be taxable as described above, whether received in additional cash or shares. Shareholders electing to receive distributions in the form of additional shares will have a cost basis for federal income tax purposes in each share so received equal to the net asset value of a share on the reinvestment date.

All distributions of taxable investment company taxable income and net capital gain, whether received in shares or in cash, must be reported by each taxable shareholder on his or her federal income tax return. Dividends or distributions declared in October, November or December as of a record date in such a month, if any, will be deemed to have been received by shareholders on December 31, if paid during January of the following year. Redemptions of shares may result in tax consequences (gain or loss) to the shareholder and are also subject to these reporting requirements.

Under the Code, the Fund will be required to report to the Internal Revenue Service all distributions of investment company taxable income and capital gains as well as gross proceeds from the redemption or exchange of the Fund's shares, except in the case of certain exempt shareholders. Under the backup withholding provisions of Section 3406 of the Code, distributions of taxable net investment income and net capital gain and proceeds from the redemption or exchange of the shares of a regulated investment company may be subject to withholding of federal income tax in the case of non-exempt shareholders who fail to furnish the investment company with their taxpayer identification numbers and with required certifications regarding their status under the federal income tax law, or if the Fund is notified by the IRS or a broker that withholding is required due to an incorrect TIN or a previous failure to report taxable interest or dividends. If the withholding provisions are applicable, any such distributions and proceeds, whether taken in cash or reinvested in additional shares, will be reduced by the amounts required to be withheld.

Other Reporting and Withholding Requirements

Payments to a shareholder that is either a foreign financial institution ("FFI") or a non-financial foreign entity ("NFFE") within the meaning of the Foreign Account Tax Compliance Act ("FATCA") may be subject to a generally nonrefundable 30% withholding tax on: (a) income dividends paid by the Fund after June 30, 2014 and (b) certain capital gain distributions and the proceeds arising from the sale of the Fund's shares paid by the Fund after December 31, 2016. FATCA withholding tax generally can be avoided: (a) by an FFI, subject to any applicable intergovernmental agreement or other exemption, if it enters into a valid agreement with the IRS to, among other requirements, report required information about certain direct and indirect ownership of foreign financial accounts held by U.S. persons with the FFI and (b) by an NFFE, if it: (i) certifies that it has no substantial U.S. persons as owners or (ii) if it does have such owners, reports information relating to them. The Fund may disclose the information that it receives from its shareholders to the IRS, non-U.S. taxing authorities or other parties as necessary to comply with FATCA. Withholding also may be required if a foreign entity that is a shareholder of the Fund fails to provide the Fund with appropriate certifications or other documentation concerning its status under FATCA.

This summary is not intended to be and should not be construed to be legal or tax advice. You should consult your own tax advisors to determine the tax consequences of owning the Fund's shares.

Options, Futures, Forward Contracts and Swap Agreements

To the extent such investments are permissible for the Fund, the Fund's transactions in options, futures contracts, hedging transactions, forward contracts, straddles and foreign currencies will be subject to special tax rules (including mark-to-market, constructive sale, straddle, wash sale and short sale rules), the effect of which may be to accelerate income to the Fund, defer losses to the Fund, cause adjustments in the holding periods of the Fund's securities, convert long-term capital gains into short-term capital gains and convert short-term capital losses into long-term capital losses. These rules could therefore affect the amount, timing and character of distributions to shareholders.

To the extent such investments are permissible, certain of the Fund's hedging activities (including its transactions, if any, in foreign currencies or foreign currency-denominated instruments) are likely to produce a difference between its book income and its taxable income. If the Fund's book income exceeds its taxable income, the distribution (if any) of such excess book income will be treated as (i) a dividend to the extent of the Fund's remaining earnings and profits (including earnings and profits arising from tax-exempt income), (ii) thereafter, as a return of capital to the extent of the recipient's basis in the shares, and (iii) thereafter, as gain from the sale or exchange of a capital asset. If the Fund's book income is less than taxable income, the Fund could be required to make distributions exceeding book income to qualify as a regular investment company that is accorded special tax treatment.

Passive Foreign Investment Companies

Investment by the Fund in certain "passive foreign investment companies" ("PFICs") could subject the Fund to a U.S. federal income tax (including interest charges) on distributions received from the company or on proceeds received from the disposition of shares in the company, which tax cannot be eliminated by making distributions to the Fund's shareholders. However, the Fund may elect to treat a PFIC as a "qualified electing fund" ("QEF election"), in which case the Fund will be required to include its share of the company's income and net capital gains annually, regardless of whether they receives any distribution from the company.

The Fund also may make an election to mark the gains (and to a limited extent losses) in such holdings "to the market" as though it had sold and repurchased its holdings in those PFICs on the last day of the Fund's taxable year. Such gains and losses are treated as ordinary income and loss. The QEF and mark-to-market elections may accelerate the recognition of income (without the receipt of cash) and increase the amount required to be distributed for the Fund to avoid taxation. Making either of these elections therefore may require the Fund to liquidate other investments (including when it is not advantageous to do so) to meet its distribution requirement, which also may accelerate the recognition of gain and affect the Fund's total return.

Foreign Currency Transactions

The Fund's transactions in foreign currencies, foreign currency-denominated debt securities and certain foreign currency options, futures contracts and forward contracts (and similar instruments) may give rise to ordinary income or loss to the extent such income or loss results from fluctuations in the value of the foreign currency concerned.

Foreign Taxation

Income received by the Fund from sources within foreign countries may be subject to withholding and other taxes imposed by such countries. Tax treaties and conventions between certain countries and the U.S. may reduce or eliminate such taxes. If more than 50% of the value of the Fund's total assets at the close of its taxable year consists of securities of foreign corporations, the Fund may be able to elect to "pass through" to the Fund's shareholders the amount of eligible foreign income and similar taxes paid by the Fund. If this election is made, a shareholder generally subject to tax will be required to include in gross income (in addition to taxable dividends actually received) his or her pro rata share of the foreign taxes paid by the Fund, and may be entitled either to deduct (as an itemized deduction) his or her pro rata share of foreign taxes in computing his or her taxable income or to use it as a foreign tax credit against his or her U.S. federal income tax liability, subject to certain limitations. In particular, a shareholder must hold his or her shares (without protection from risk of loss) on the ex-dividend date and for at least 15 more days during the 30-day period surrounding the ex-dividend date to be eligible to claim a foreign tax credit with respect to the dividend. No deduction for foreign taxes may be claimed by a shareholder who does not itemize deductions. Each shareholder will be notified within 60 days after the close of the Fund's taxable year whether the foreign taxes paid by the Fund will "pass through" for that year.

Generally, a credit for foreign taxes is subject to the limitation that it may not exceed the shareholder's U.S. tax attributable to his or her total foreign source taxable income. For this purpose, if the pass-through election is made, the source of the Fund's income will flow through to shareholders of the Fund. With respect to the Fund, gains from the sale of securities generally will be treated as derived from U.S. sources and certain currency fluctuation gains, including fluctuation gains from foreign currency-denominated debt securities, receivables and payables generally will be treated as ordinary income derived from U.S. sources. The limitation on the foreign tax credit is applied separately to foreign source passive income, and to certain other types of income. A shareholder may be unable to claim a credit for the full amount of his or her proportionate share of the foreign taxes paid by the Fund. The foreign tax credit can be used to offset only 90% of the revised alternative minimum tax imposed on corporations and individuals and foreign taxes generally are not deductible in computing alternative minimum taxable income.

Original Issue Discount and Pay-In-Kind Securities

Current federal tax law requires the holder of a U.S. Treasury or other fixed income zero coupon security to accrue as income each year a portion of the discount at which the security was originally issued, even though the holder receives no interest payment in cash on the security during the year. In addition, other debt instruments, such as pay-in-kind securities may give rise to income under the original issue discount rules, which income is required to be distributed and is taxable even though the Fund holding the security receives no interest payment in cash on the security during the year.

Some of the debt securities (with a fixed maturity date of more than one year from the date of issuance) that may be acquired by the Fund may be treated as debt securities that are issued originally at a discount. Generally, the amount of the original issue discount ("OID") is treated as interest income and is included in income over the term of the debt security, even though payment of that amount is not received until a later time, usually when the debt security matures. A portion of the OID includable in income with respect to certain high-yield corporate debt securities (including certain pay-in-kind securities) may be treated as a dividend for U.S. federal income tax purposes.

Some of the debt securities (with a fixed maturity date of more than one year from the date of issuance) that may be acquired by the Fund in the secondary market may be treated as having market discount. Generally, any gain recognized on the disposition of, and any partial payment of principal on, a debt security having market discount is treated as ordinary income to the extent the gain, or principal payment, does not exceed the "accrued market discount" on such debt security. Market discount generally accrues in equal daily installments. The Fund may make one or more of the elections applicable to debt securities having market discount, which could affect the character and timing of recognition of income.

Some debt securities (with a fixed maturity date of one year or less from the date of issuance) that may be acquired by the Fund may be treated as having acquisition discount, or OID in the case of certain types of debt securities. Generally, the Fund will be required to include the acquisition discount, or OID, in income over the term of the debt security, even though payment of that amount is not received until a later time, usually when the debt security matures. The Fund may make one or more of the elections applicable to debt securities having acquisition discount, or OID, which could affect the character and timing of recognition of income.

The Fund that holds the foregoing kinds of securities may be required to pay out as an income distribution each year an amount, which is greater than the total amount of cash interest the Fund actually received. Such distributions may be made from the cash assets of the Fund or by liquidation of portfolio securities, if necessary (including when it is not advantageous to do so). The Fund may realize gains or losses from such liquidations. In the event the Fund realizes net capital gains from such transactions, its shareholders may receive a larger capital gain distribution, if any, than they would in the absence of such transactions.

Shareholders of the Fund may be subject to state and local taxes on distributions received from the Fund and on redemptions of the Fund's shares.

The foregoing discussion relates only to U.S. federal income tax law as applicable to U.S. persons (that is, U.S. citizens and residents, and domestic corporations, partnerships, trusts and estates). Shareholders who are not U.S. persons should consult their tax advisors regarding the U.S. and foreign tax consequences of an investment in the Fund.

A brief explanation of the form and character of the distribution accompany each distribution. In January of each year the Fund issues to each shareholder a statement of the federal income tax status of all distributions.

Shareholders should consult their tax advisers about the application of federal, state and local and foreign tax law in light of their particular situation.

Wholly Owned Subsidiary

The Fund intends to invest a portion of its assets in the Subsidiary, which will be classified as a corporation for U.S. federal income tax purposes. A foreign corporation, such as the Subsidiary, will generally not be subject to U.S. federal income taxation unless it is deemed to be engaged in a U.S. trade or business. It is expected that the Subsidiary would conduct its activities in a manner so as to meet the requirements of a safe harbor under Section 864(b)(2) of the Internal Revenue Code (the "Safe Harbor") pursuant to which the Subsidiary, provided it is not a dealer in stocks, securities or commodities, may engage in the following activities without being deemed to be engaged in a U.S. trade or business: (1) trading in stocks or securities (including contracts or options to buy or sell securities) for its own account; and (2) trading, for its own account, in commodities that are "of a kind customarily dealt in on an organized commodity exchange" if the transaction is of a kind customarily consummated at such place. Thus, the Subsidiary's securities and commodities trading activities should not constitute a U.S. trade or business. However, if certain of the Subsidiary's activities were determined not to be of the type described in the Safe Harbor or if the Subsidiary's gains are attributable to investments in securities that constitute U.S. real property interests (which is not expected), then the activities of a Subsidiary may constitute a U.S. trade or business, or be taxed as such.

In general, a foreign corporation that does not conduct a U.S. trade or business is nonetheless subject to tax at a flat rate of 30 percent (or lower tax treaty rate), generally payable through withholding, on the gross amount of certain U.S.-source income that is not effectively connected with a U.S. trade or business. There is presently no tax treaty in force between the U.S. and the Cayman Islands that would reduce this rate of withholding tax. Income subject to such a flat tax includes dividends and certain interest income. The 30 percent tax does not apply to U.S.-source capital gains (whether long-term or short-term) or to interest paid to a foreign corporation on its deposits with U.S. banks. The 30 percent tax also does not apply to interest which qualifies as "portfolio interest." The term "portfolio interest" generally includes interest (including original issue discount) on an obligation in registered form which has been issued after July 18, 1984 and with respect to which the person, who would otherwise be required to deduct and withhold the 30 percent tax, received the required statement that the beneficial owner of the obligation is not a U.S. person within the meaning of the Internal Revenue Code. Under certain circumstances, interest on bearer obligations may also be considered portfolio interest.

The Subsidiary, is wholly-owned by the Fund. A U.S. person who owns (directly, indirectly or constructively) 10 percent or more of the total combined voting power of all classes of stock of a foreign corporation is a "U.S. Shareholder" for purposes of the controlled foreign corporation ("CFC") provisions of the Internal Revenue Code. A foreign corporation is a CFC if, on any day of its taxable year, more than 50 percent of the voting power or value of its stock is owned (directly, indirectly or constructively) by "U.S. Shareholders." Because the Fund is a U.S. person that will own all of the stock of the Subsidiary, if utilized, the Fund would be a "U.S. Shareholder" and the Subsidiary a CFC. As a "U.S. Shareholder," the Fund would be required to include in gross income for United States federal income tax purposes all of its Subsidiary's "subpart F income" (defined, in part, below), whether or not such income is distributed by the Subsidiary. It is expected that all of the Subsidiary's income would be "subpart F income." "Subpart F income" generally includes interest, original issue discount, dividends, net gains from the disposition of stocks or securities, receipts with respect to securities loans and net payments received with respect to equity swaps and similar derivatives. "Subpart F income" also includes the excess of gains over losses from transactions (including futures, forward and similar transactions) in any commodities. The Fund's recognition of a Subsidiary's "subpart F income" would increase the Fund's tax basis in the Subsidiary. Distributions by the Subsidiary to the Fund would be tax-free, to

the extent of its previously undistributed "subpart F income," and correspondingly reduce the Fund's tax basis in the Subsidiary. "Subpart F income" is generally treated as ordinary income, regardless of the character of the Subsidiary's underlying income.

In general, each "U.S. Shareholder" is required to file IRS Form 5471 with its U.S. federal income tax (or information) returns providing information about its ownership of the CFC and the CFC. In addition, a "U.S. Shareholder" may in certain circumstances be required to report a disposition of shares in a Subsidiary by attaching IRS Form 5471 to its U.S. federal income tax (or information) return that it would normally file for the taxable year in which the disposition occurs. In general, these filing requirements will apply to investors of the Fund if the investor is a U.S. person who owns directly, indirectly or constructively (within the meaning of Sections 958(a) and (b) of the Internal Revenue Code) 10 percent or more of the total combined voting power of all classes of voting stock of a foreign corporation that is a CFC for an uninterrupted period of 30 days or more during any tax year of the foreign corporation, and who owned that stock on the last day of that year.

INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

The Fund has selected Deloitte & Touche LLP, located at 695 Town Center Drive, Suite 1000, Costa Mesa, CA 92626 as its independent registered public accounting firm for the current fiscal year providing services including (1) audit of annual financial statements, and (2) assistance and consultation in connection with SEC filings.

LEGAL COUNSEL

Thompson Hine LLP, 41 South High Street, Suite 1700, Columbus, Ohio 43215 serves as the Trust's legal counsel.

FINANCIAL STATEMENTS

The audited financial statements and report of the independent registered public accounting firm required to be included in this SAI are hereby incorporated by reference to the Annual Report for the Fund for the fiscal year ended December 31, 2023. You can obtain a copy of the [Annual Report](#) without charge by calling the Fund at 1-877-772-5838.

Appendix A: ADVISER'S PROXY VOTING POLICIES AND PROCEDURES

ALTEGRIS ADVISORS, L.L.C.

PROXY VOTING POLICY

Pursuant to Rule 206(4)-6 and Rule 204-2 under the Advisers Act, it is a fraudulent, deceptive, or manipulative act, practice or course of business, within the meaning of Section 206(4) of the Advisers Act, for an investment adviser to exercise voting authority with respect to client securities, unless (A) the adviser has adopted and implemented written policies and procedures that are reasonably designed to ensure that the adviser votes proxies in the best interests of its clients, (B) the adviser describes its proxy voting procedures to its clients and provides copies on request, and (C) the adviser discloses to clients how they may obtain information on how the adviser voted their proxies.

Voting Proxies

With respect to the Investment Funds, the Adviser does not transact securities transactions on behalf of the Investment Funds except for its allocation (and subsequent subscriptions and redemptions) into each Investment Fund's respective Underlying Fund(s). These Underlying Funds are privately offered securities. Once allocated, the Adviser does not exercise discretion with respect to the underlying investments purchased by the private investment fund managers of the Underlying Funds in which the Investment Funds invest. Therefore, it is anticipated that the managers of the Underlying Funds will vote all proxies. However, should an Investment Fund be put in a position to vote a security, the Adviser will adhere to this Proxy Voting Policy.

With respect to the Advisory Funds (other than a Closed-End Fund), the Adviser currently conveys all authority to vote proxies on their behalf to sub-advisers, pursuant to the sub-advisory agreements entered into between the Adviser and each respective sub-adviser. However, should a sub-adviser not be in a position to vote a proxy relating to a security held by an Advisory Fund, the Adviser stands prepared, upon notice and in accordance with applicable proxy voting policies, to take the necessary action. The Adviser will review and maintain a record of the sub-adviser's policies, procedures, and reporting provided to the NLFT with respect to related matters, including the Form N-PX. The Adviser will review its operations at least annually to confirm compliance with its policies and procedures. With respect to a Closed-End Fund, the Adviser may determine to retain authority to vote proxies and will follow the Proxy Voting Policy described below.

The Adviser will vote proxies on behalf of its Clients, as required. In order to fulfill its responsibilities under the Advisers Act, the Adviser has adopted the following policies and procedures for proxy voting with regard to companies in the investment portfolio of Advisory Funds.

- A. All proxies sent to Clients that are actually received by the Adviser (to vote on behalf of the Client) will be provided to the Executive Officers.
- B. The Executive Officers will generally adhere to the following procedures (subject to limited exception):
 - 1. A written record of each proxy received by the Adviser (on behalf of its Clients) will be kept in the Adviser's files;
 - 2. The Executive Officers will determine which of the Adviser's Clients holds the security to which the proxy relates;
 - 3. Prior to voting any proxies, the Executive Officers will determine if there are any conflicts of interest related to the proxy in question in accordance with the general guidelines set forth below. If a conflict is

identified, the Executive Officers will then make a determination (which may be in consultation with outside legal counsel) as to whether the conflict is material.

4. If no material conflict is identified pursuant to these procedures, the Executive Officers will vote the proxy in accordance with the guidelines set forth below. The Executive Officers will deliver the proxy in accordance with instructions related to such proxy in a timely and appropriate manner.
5. If, as a result of a decrease in the outstanding voting securities of an unaffiliated investment company or UIT, the Advisory Group (or a sub-advisory group), each in the aggregate, becomes a holder of 25 percent or more of the outstanding voting securities of the unaffiliated investment company or UIT, then the Adviser (or the Adviser will cause a sub-adviser) will vote its shares of the unaffiliated investment company or UIT in the same proportion as the vote of all other holders of the unaffiliated investment company's or UIT's shares.

Conflicts of Interest

- A. As stated above, in evaluating how to vote a proxy, the Executive Officers will first determine whether there is a material conflict of interest related to the proxy in question between Adviser and its Clients. This examination will include (but will not be limited to) an evaluation of whether the Adviser (or any affiliate of the Adviser) has any business or personal relationship with the company (or an affiliate of the company) to which the proxy relates outside of an investment in such company by a Client of the Adviser.
- B. If a conflict is identified and deemed "material" by the Executive Officers, the Adviser may resolve such conflicts in a variety of ways. In most cases, to the extent that there is little or no discretion to deviate from the Advisory Funds' policies and procedures on the proposal in question, proxies will be voted in accordance with such pre-determined guidelines. In other situations, the Executive Officers may (a) defer to the voting recommendation of either a non-conflicted party or an independent third party proxy voting service provider; (b) in consultation with legal counsel determine the appropriate method to resolve the conflict of interest; or (c) vote pursuant to client direction. The method selected may vary depending upon the facts and circumstances of each situation. Examples of material conflicts of interest include, but are not limited to: a situation where the adviser provides significant investment advisory or other services to a company whose management is soliciting proxies; an officer of the Adviser serves on the board of a charitable organization that receives charitable contributions from the portfolio company and the charitable organization is a client of the Adviser; a portfolio company that is a significant selling agent of the Adviser's products and services solicits proxies; a broker-dealer or insurance company that controls 5% or more of the Adviser's assets solicits proxies; the Adviser and the portfolio company have a lending relationship. In each of these situations voting against management may cause the Adviser a loss of revenue or other benefit.
- C. With respect to ERISA clients whose advisory contract reserves the right to vote proxies when the Adviser has determined that a material conflict exists that affects its best judgment as a fiduciary to the ERISA client, the Adviser will:
 1. Give the ERISA client the opportunity to vote the proxies in question themselves; or
 2. Follow designated special proxy voting procedures related to voting proxies pursuant to the terms of the investment management agreement with such ERISA clients (if any).

Proxy Voting Guidelines

Proxy proposals received by the Adviser that relate to matters involving Clients' accounts or investments will be reviewed to determine the relevance of issues presented by the proxies, and the materiality of those issues to Clients. Such determinations will be made by the Executive Officers, or by a department head or other person (a "**Designated Officer**") having delegated authority from the Executive Officers to make such determinations. The Executive Officers

or a Designated Officer will then: (1) vote the proxy (or determine not to cast a vote) consistent with his, her, or their professional investment judgment as to what course of action best serves the financial and economic interests of Clients affected by the proxy; or (2) instruct an underlying sub-adviser, manager or custodian of Clients' assets, as applicable, regarding how to vote the proxy (or not to cast a vote) consistent with his, her, or their professional investment judgment as to what course of action best serves the financial and economic interests of Clients affected by the proxy.

As a matter of general policy, the Adviser is likely to vote against any management proposals from publicly held companies that may, if passed, serve to insulate companies from the discipline of the market, from accountability to shareholders or from prudent regulatory compliance. Although each proxy may present unique issues requiring special consideration, the Adviser's policies with respect to typical categories of proxies received from time to time in connection with Clients' investments are set out below.

Operational Proposals. Proxies that relate to this category of proposals are a standard and necessary aspect of business operations of companies in which the Adviser may invest, and often may not have a significant effect on the value of the investment. Factors that may be considered in reviewing these proposals include the financial performance of the company, attendance and independence of board members and committees, and enforcement of strict accounting practices. If the Adviser determines to vote such proxies relating to operational proposals, it generally will be inclined to support company management in such matters, unless in the professional judgment of the Executive Officers or a Designated Officer the particular proposals to be voted on appear not to be in the best interests of Clients. Operations related proposals often relate to matters including, but not limited to: (1) name changes; (2) election of directors; (3) ratification of auditors; (4) maintenance of directors and officer's indemnification and liability policies; or (5) ratification of employee stock purchase or ownership plans.

Changes in Corporate Structure or Status. Proxies relating to this category of proposals typically involve changes in status, ownership or classes of securities of a corporation, such as proposals regarding: (1) mergers, acquisitions, and restructurings; (2) reincorporations; or (3) changes in capitalization. Proxies falling within this category for which the Adviser determines to cast a vote will be reviewed by the Executive Officers or a Designated Officer, and voted, on a case-by-case basis taking into account all relevant facts and circumstances surrounding each such proposal.

Shareholder Democracy. The Adviser generally will be inclined to support proposals that enhance shareholder democracy, and vote against proposals that attempt to materially limit shareholder democracy or restrict the ability of Clients to realize the value of their investments. Proposals that restrict shareholder democracy may include, for example, proposals endorsing or facilitating: (1) unreasonable increases in indemnification or liability protections for directors and officers; (2) supermajorities or other unequal voting rights proposals; (3) classified or staggered boards of directors; (4) authorization of additional outstanding causing unfair dilution to existing shareholders' interests; or (5) altered corporate structure or change in corporate domicile disadvantageous to the economic interests of shareholders.

Executive Compensation. The Adviser believes generally that reasonable compensation is appropriate for directors, executives and employees of companies in which the Adviser invests on behalf of Clients. Compensation should be used as an incentive to align the interests of the involved parties with the long-term financial success of a company but should not be excessive or utilized in a way that compromises independence or creates conflicts of interest. The Adviser will review any proxy proposals relating to executive compensation for which it determines to cast a vote on a case-by-case basis in light of these general principles and the relevant facts and circumstances surrounding each such proposal.

Other Matters. Other categories of proxy proposals include those that address social, environmental, and issues of conscience with regard to the business conduct of a company. As with all proxies, the Adviser will review each issue on a case-by-case basis in accordance with these Proxy Voting Policies to determine what will best benefit the financial and economic interests of any Clients affected by each such proposal.

16.4 Disclosure of Procedures

Clients will be provided with contact information as to how they can obtain information about: (1) the Adviser's proxy voting procedures (i.e., a copy of these procedures); and (2) how the Adviser voted proxies that are relevant to the affected Client.

16.5 Record-keeping Requirements

The Executive Officers will be responsible for maintaining files relating to the Adviser's proxy voting procedures. Records will be maintained and preserved for five years from the end of the fiscal year during which the last entry was made on a record, with records for the first two years kept in the offices of the Adviser. Records of the following will be included in the files:

- A. Copies of these proxy voting policies and procedures, and any amendments thereto;
- B. A copy of each proxy statement that the Adviser actually received; provided, however, that the Adviser may rely on obtaining a copy of proxy statements from the SEC's EDGAR system for those proxy statements that are so available;
- C. A record of each vote that the Adviser casts;
- D. A copy of any document that the Adviser created that was material to making a decision on how to vote the proxies, or memorializes that decision (if any); and
- E. A copy of each written request for information on how the Adviser voted such Client's proxies and a copy of any written response to any request for information on how the Adviser voted proxies on behalf of Clients.
